

CLOUD GOVERNANCE FRAMEWORK

Designing a framework of principles, processes and tooling to enable governance in the cloud.

- **Improve Risk Resilience** – Setup the guardrails and framework to mitigate risks with the cloud.
- **Improve Compliance** – Ensure organization is compliant against changing industry requirements.
- **Proactive and Scalable Approach to Governance** – Ensure the organization understands the importance of governance throughout their cloud journey.

Moving to the cloud presents a different landscape and a different set of challenges for organizations. It requires a large amount of business change. Managing this change can be difficult unless the organizations start establishing controls.

With our **Cloud Governance Framework**, we help design a set of principles, processes and tooling that enable organizations to implement the right governance controls in the cloud, which help improve scalability, risk resilience, efficiency and cost optimization throughout their cloud journey.

Holistic approach to cloud governance

We take a holistic approach by assessing the current state and future requirements across different areas of governance, such as:

- Monitoring and Reliability
- Security
- Identity and Access Management
- Cost Optimization
- Deployment Automation
- Data Governance
- Multi-Cloud Governance
- Auditing and Compliance

Understand improvement areas to enable governance.

Tailored technical and business recommendations

Our recommendations are not solely based on technology, but also business considerations.

We make sure to involve all key stakeholders and tailor best practice recommendations around governance to their requirements

Incorporate governance in business processes and culture, as much as in tooling and architecture.

Why Customers Use the Cloud Governance Framework:

- Develop a proactive and scalable approach to cloud governance
- Improve risk resilience, security and compliance
- Improve cost optimization
- Improve governance across different areas of the cloud
- Improve data governance
- Improve efficiency
- Improve time-to-market in cloud

Governance as part of a larger transformation

We treat governance as part of a large cloud transformation journey.

We make sure that our recommendations are aligned to any current or future migrations, landing zone builds, transition to operations, data and analytics initiatives, etc.

Ensure governance is not treated as an afterthought, but a critical part of their journey.

We help organizations understand what controls to implement to improve risk resilience, security and compliance.

Discovery and Analysis

- Kick off meeting
- Discovery Sessions to gather requirements for:
 - Monitoring and Reliability
 - Security
 - Identity and Access Management
 - Cost Optimization
 - Deployment Automation
 - Data Governance
 - Multi-Cloud Governance
 - Auditing and Compliance

Framework Build and Presentation

- Create a Governance Framework Report for the areas assessed during Discovery and Analysis to establish the right principles, processes and tooling.
- Executive Summary presentation
- Discuss project results and next steps

Cloud Governance Framework

Our promise to you

We will design a framework to help you enable and scale cloud governance across your business.

An offer to get you started

We will lead strategic discussions across different areas of the business to get a holistic understanding of what needs to change to enable governance in your cloud environment. We ensure you will have a framework to follow to deliver these changes across the organization.

Discovery and Analysis

Framework Build and Presentation

Customer Benefits

- Improve risk resilience, security and compliance by ensuring the right controls are in place.
- More proactive and scalable approach to governance.
- Improve efficiency by learning ways to automate governance and optimize business processes.
- Improve cost optimization by learning how to avoid or eliminate unneeded costs.
- Improve time to market by having clear deployment rules and pipelines.

Why Cloudreach?

We elevate technology and people so you can reach new heights.

Cloud Software

Software designed to accelerate cloud adoption.

Consulting Services

Cloud experts ready to guide to the cloud.

Managed Services

24x7 cloud infrastructure, application, and cost support
