---

## Properties

- **Service Type:** Professional Service - Workshop
- **Primary Product:** Microsoft Azure AI Foundry/ Microsoft Copilot

## Offer Listing Details

### Name

Enterprise AI Agent Discovery Workshop

### Search Results Summary

Empower your business with AI. This expert-led workshop helps you discover high-ROI AI Agent use cases, aligning your team on AI governance, and creating a tailored roadmap from zero to one.

### Description

**[ValueProposition]** The "Enterprise AI Agent Discovery Workshop" is designed for businesses stepping into AI transformation. AI Agents are more than simple chatbots; they are digital assistants capable of planning, memory, utilizing tools, and taking autonomous actions to complete complex workflows. This workshop leverages design thinking and consulting methodologies to help your enterprise overcome common challenges such as a lack of internal AI talent, uncertainty regarding applicable use cases, and concerns over security and compliance.

Our core advantages include a strong focus on security and AI governance (including input/output guardrails and role-based access control), end-to-end consulting services, seamless integration with existing systems (e.g., ERP, CRM), and extensive cross-cloud deployment experience.

### **[TargetAudience]**

- **0→1Starters:** Companies or departments with limited resources seeking small-scale, high-impact AI pilots.
- **Implementers:** Managers or Project Managers without technical backgrounds who require expert guidance to plan and drive AI adoption.

**[DetailedAgenda]** This workshop includes preparation, a 2-day core program, and a post-workshop alignment meeting:

- ♦ **Session1:AIFoundationCourse(2Hours)**
  - *Audience:* All Participating Employees and AI Seed Members (approx. 60 attendees).
  - *Goal:* Eliminate employee anxiety regarding AI. Establish foundational concepts and use cases for AI Agents, enabling staff to understand AI using their own professional terminology. Overview of Microsoft AI development tool like Copilot Studio and AI Foundry with agent framework.
- ♦ **Session2:AIAgentUseCaseDiscoveryWorkshop(3Hours)**

- *Audience:* Department Heads and AI Seed Members (approx. 30 attendees).
- *Goal:* Through guided group discussions, brainstorm AI-assisted workflows based on genuine business "pain points." Generate actionable, department-level AI Agent ideas.
- **Post-Workshop: Alignment Meeting (1 Hour)**
  - *Audience:* Department Heads and Core Decision Makers.
  - *Goal:* Consolidate the outputs from Session 1 and Session 2, confirm the priority of identified workflows, and plan the next steps.

### [Deliverables]

1. A summary of enterprise AI Agent adoption principles and high-level consensus on governance and risk.
2. A Enterprise AI whole picture with Microsoft AI Foundry and Azure AI services.
3. Foundational AI literacy and capability building across participating teams.
4. A customized "Departmental AI Agent Use Case List" with recommendations for implementation priority.
