CLOUD SECURITY
ASSESSMENT

CLOUD SERVUS

OVERVIEW

Cloud Computing provides businesses with increased capabilities to build, deploy, and scale applications and frameworks to best fit their goals.

Understanding your strategy in the cloud, as well as potential risks is the key to the successful adoption of cloud technologies.

A Cloud Security Assessment offers insight into your environment with actionable information to increase your cloud security posture.
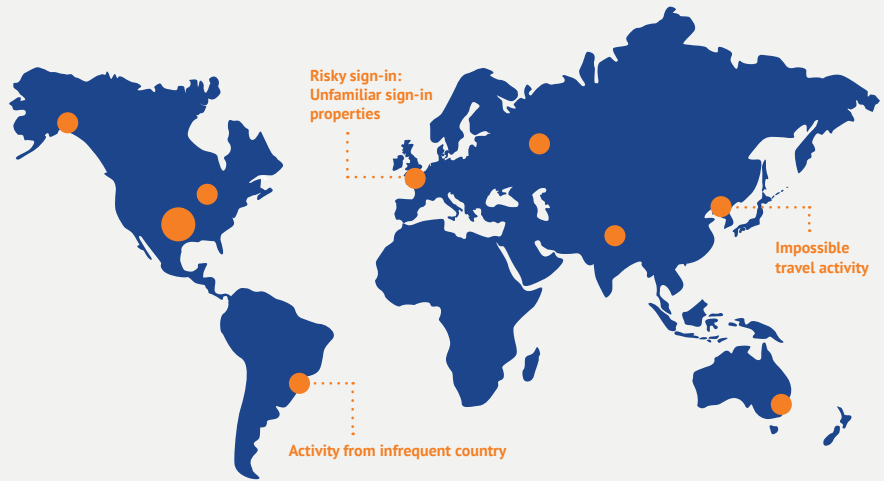

DELIVERABLES

A comprehensive review of your existing cloud environment, including security and compliance status.

Best Practice Review and next steps to increase your Azure/Microsoft 365 security posture.

Insight on risky activity and potential data leakage.
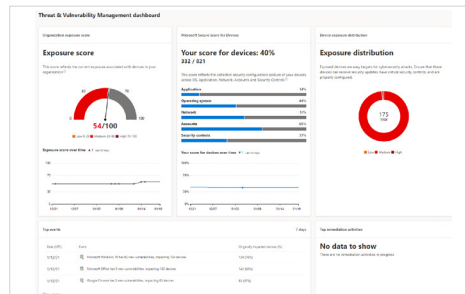

AREA REVIEW
