Device Management	User Rights Management	Industry Compliance
<p>Ensure business information is protected on all your company-owned and bring-your-own (BYO) devices through cloud-based mobile device management.</p> <p>You will also get security alerts based on suspicious user activity.</p>	<p>Help you in control who can access what files and folders and for how long.</p> <p>You will have the ability to automatically revoke access after a certain time, or only permit access from specified devices.</p>	<p>Help your organization protect the data you store in cloud and comply with legal and regulatory standards.</p> <p>An Intune Consultant can help you setup easy access to the data and tools you need to manage to your organization's compliance needs.</p>

How does it work?

1- Cloud Strategy Call

In this 30-Minute session, a Cloud Solutions Consultant would listen to your needs and suggest a solution that suits your requirements. We limit each customer to a maximum of 1 strategy call.

2- Project Planning & Cloud Readiness Assessment

Depending on the goals agreed upon in the strategy call, a Microsoft Certified Cloud Solutions Intune Consultant would review your existing environment in depth and prepare a report that lists down the key elements that your business

would benefit from by migrating to the cloud along with any challenges, and a step by step execution plan

3- Project Execution & Change Management

Our Intune Consultant would execute the project in line with Deployment and Security Best Practices within the agreed timelines based on the Assessment Report & Project Plan Document

4- Training & Adoption

For the final step, the Intune Consultant will ensure that your team is fully trained and ready to adopt the new solution and the transition to cloud is smooth.
