

DIGITAL REGULATOR

CATALYST

PROGRAMME

What is the Catalyst Programme

The CloudSource Digital Regulator Catalyst Programme is based on the IDEA Framework and designed specifically for UK Regulatory bodies to prepare for and embrace digital change.

Inspire, **Design**, and **Empower** are three key stages that will provide you with a vision, structure and roadmap that will guide you to **Achieve** Digital Regulatory, Compliance, and Transparency operations.

At every stage, CloudSource consultants will work closely with you and contribute technology innovations that will shape your future-proofed digital organisation.

Everything starts with an I.D.E.A

Inspire

Imagine a Future Organisation

Take the initial steps by identifying the operational hotspots and surfacing the business value through envisioning workshops with your organisations' senior stakeholders.

Design

Prove the Art of Possible

Bring your goals to life by through prototyping new ways of working and showcasing the future state organisational flows and build a compelling case for change.

Empower

Gain Authentic Buy-In

Set out the digital journey roadmap and implement program governance through immersive experiences and buy-in from key stakeholders.

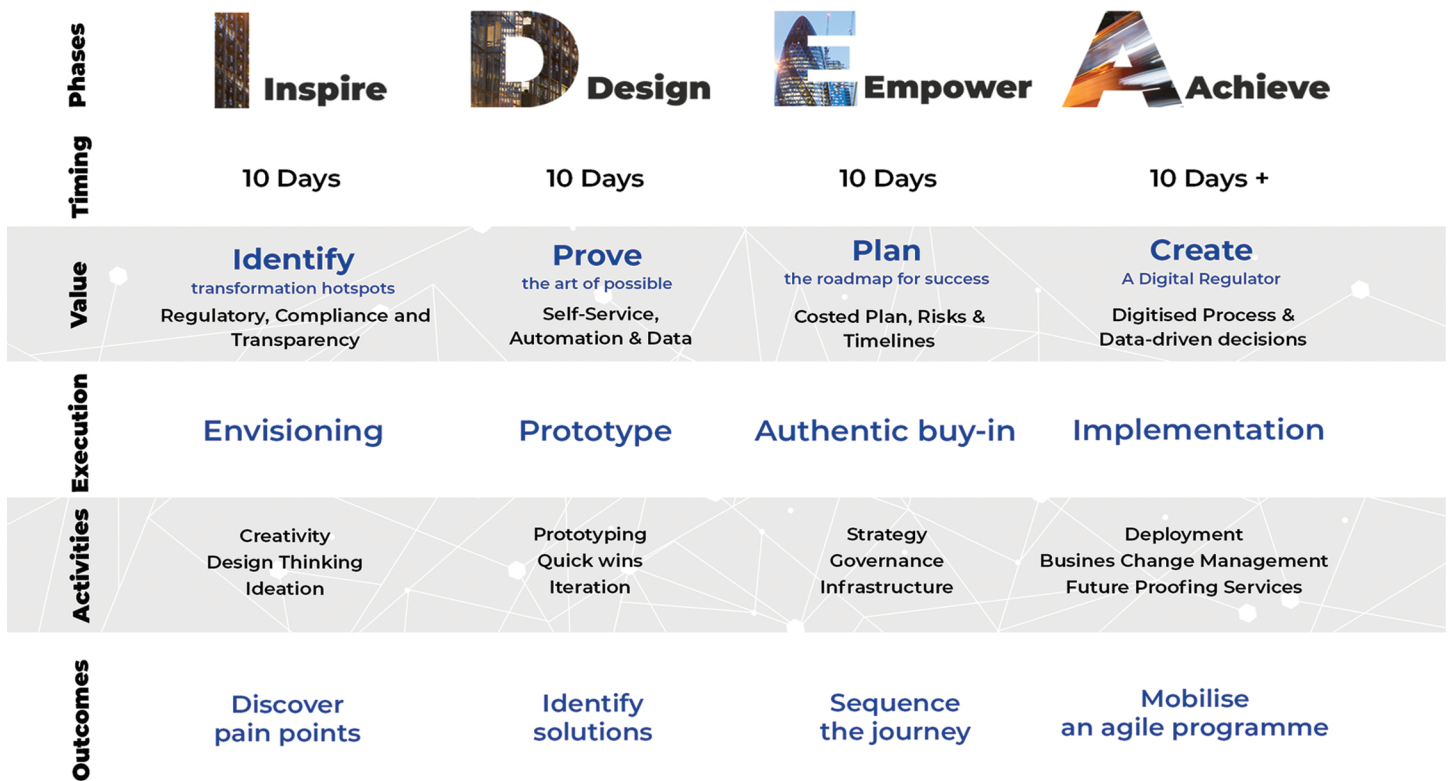

Achieve

Deploy the Digital Platform

Achieve a future state digital organisation through executing the business change, strategy implementation, and business transformation across departments.

Catalyst Programme Framework

Why CloudSource

CloudSource has been working with UK Regulatory Bodies since 2014 to modernise, digitise and innovate their regulatory, compliance, and transparency business processes.

Our tried and tested agile project methodology, which is aligned with GDS standards, fully dedicated project teams of subject matter experts, and in-depth knowledge of best-in-class Microsoft Cloud Technology are key success factors for effectively transforming regulatory organisations in the digital era.

We have worked with the largest Healthcare Professionals Regulator where we digitised the full registrant journey from education, applications, registrations, renewals and casework through to cease to practice.

Our work with the Water Service Regulation Authority accelerated the digitisation of license applications, registers, disputes, complaints, enquiries, and whistle-blower processes.
