

AI IGNITE: GETTING PUBLIC SERVICES FUTURE READY

BUILD AN AI CAPABILITY WITHIN YOUR ORGANISATION

CloudSource AI Ignite program accelerates public-sector organisations' AI adoption. Through a structured set of workshops and activities based on Microsoft's IDEA framework, CloudSource can advise and guide on ethical, secure, and efficient AI adoption.

As AI becomes vital for expediting data-driven decision-making, public-sector entities must cultivate AI aptitude. However, challenges like workforce impact, data security, and ethics persist.

AI Ignite empowers public-sector organisations with risk-free AI exploration, creating a future vision and innovating employee & citizen experiences.

Of leaders say their employees will need new skills to be prepared for the growth of AI.

Of employees say they would delegate as much work as possible to AI in order to improve their productivity.

Of business leaders say they're concerned about the lack of innovation.

*Statistics taken from 2023 Work Trend Index: Annual Report

Inspire

Explore and understand the capability and power of AI. Identify use cases where leveraging AI can innovate and future-proof business processes.

Design

Assess and validate organisational readiness and understand the impact of implementing AI. Address risks and build confidence through a robust governance & strategy.

Empower

Demonstrate AI value, build trust and gain stakeholder buy-in through the development of a representational solution prototype.

Achieve

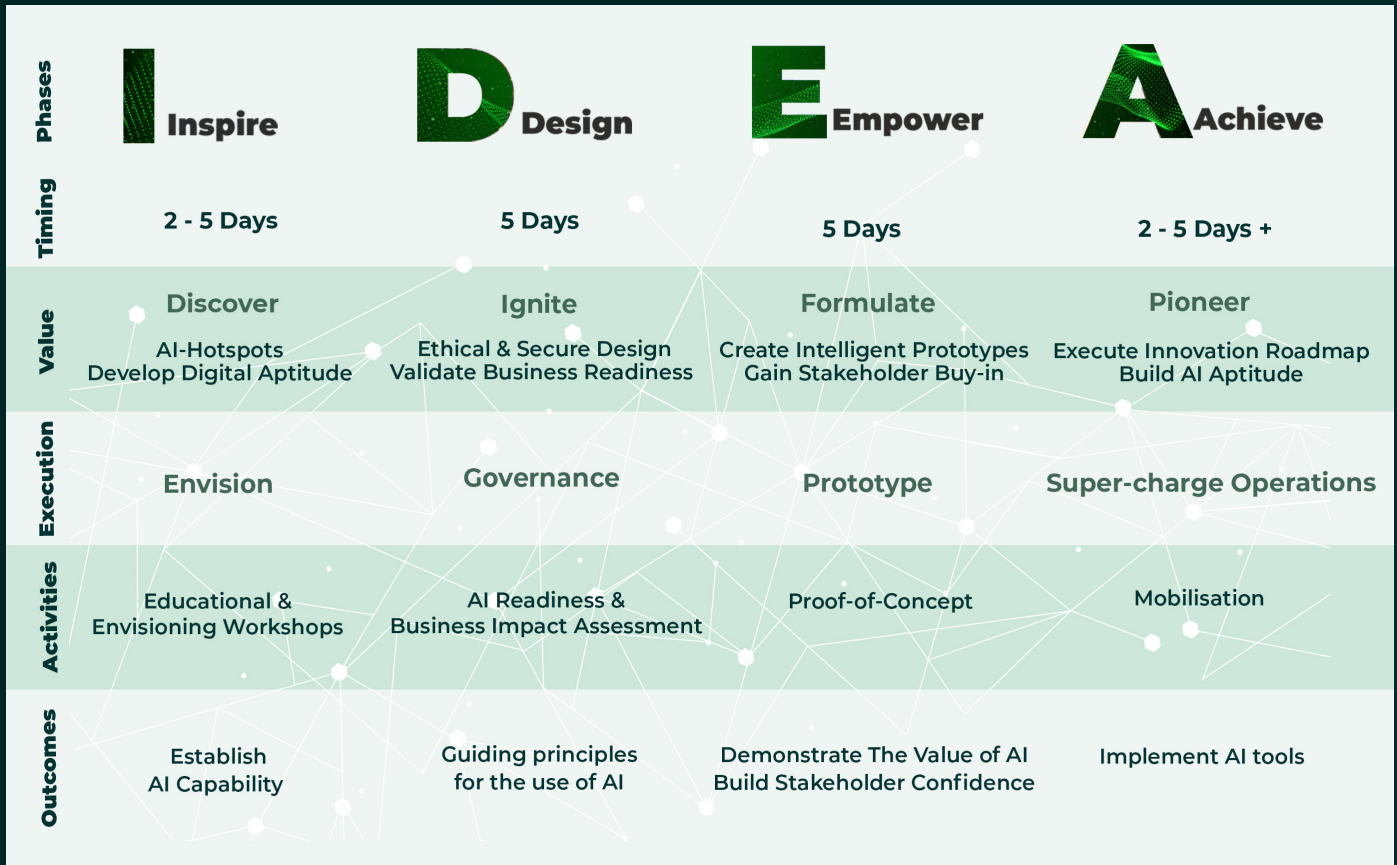

Achieve AI aptitude and mobilise the innovation roadmap to super-charge business operations and fully digitise essential business services.

AI Enhancement

Data & Platform

AI IGNITE: EVERYTHING STARTS WITH AN IDEA

WHY CLOUDSOURCE

CloudSource is an award-winning GovTech business with an unrivalled track record of success working with Public Sector Organisations to modernise, digitise and innovate their business services.

Our success has been achieved with, but not limited to, DEFRA Nursing & Midwifery Council (NMC), The Pensions Regulator, The Water Services Regulation Authority (Ofwat), and non-departmental public bodies such as HS2.

Our dedicated project teams of subject-matter experts, coupled with an in-depth knowledge of best-in-class Microsoft Cloud Technology, are key success factors in effectively enabling digital transformation within the UK Public Sector services.
