

AI Ignite: Getting Public Services Future-Ready

Build an AI Capability within your Organisation

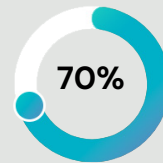

CloudSource AI Ignite program accelerates public sector organisations' AI adoption. Through a structured set of workshops based on Microsoft's IDEA framework, CloudSource can advise and guide on ethical, secure, and efficient AI adoption.

As AI becomes vital for expediting data-driven decision-making, public-sector entities must cultivate AI aptitude. However, challenges like workforce impact, data security, and ethics persist.

AI Ignite empowers organisations with risk-free AI exploration, creating a future vision and innovating employee and citizen experiences.

Leaders say their employees will need new skills to be prepared for the growth of AI.

Employees would delegate as much work as possible to AI in order to boost productivity.

Business leaders say they're concerned about the lack of innovation.

*statistics taken from 2024 Work Trend Index: Annual Report

Inspire

Explore and understand the capability and power of AI. Identify use cases where leveraging AI can innovate and future-proof business processes.

Design

Assess and validate organisational AI readiness and understand the impact of AI adoption. Address risks and build confidence through a robust governance strategy.

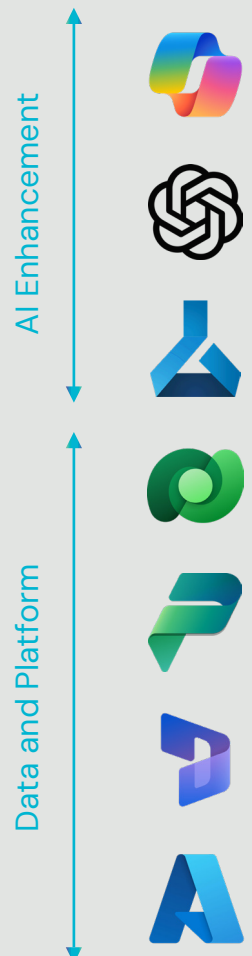

Empower

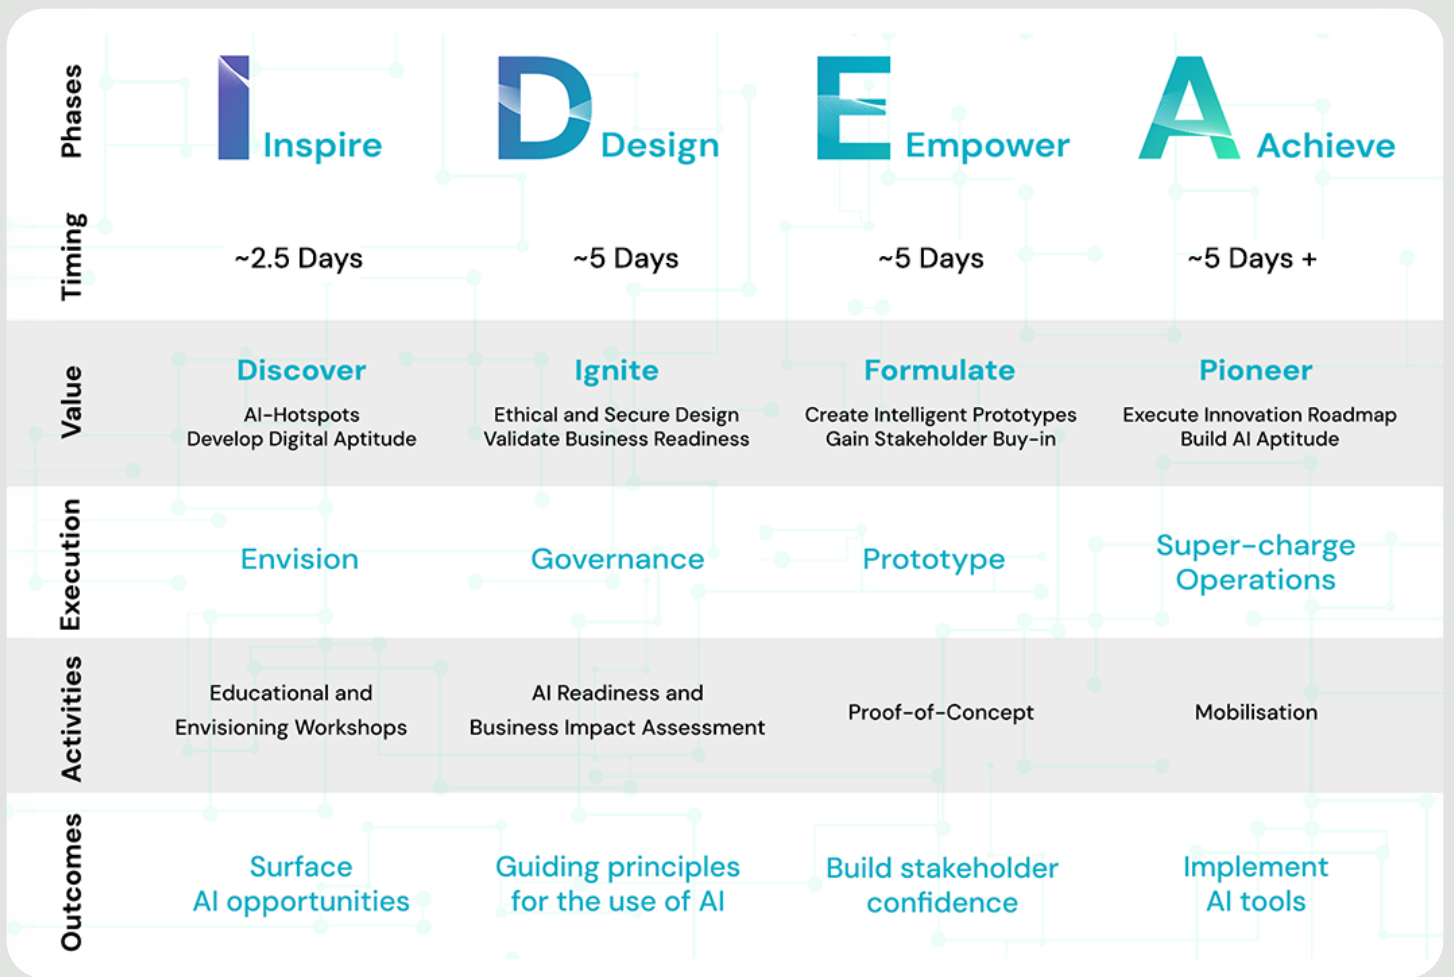

Demonstrate AI value, build trust and gain stakeholder buy-in through the development of a representational solution prototype.

Achieve

Achieve AI aptitude, mobilise the innovation roadmap to super-charge business operations, and accelerate essential business services.

Why CloudSource

CloudSource is an award-winning GovTech business with an unrivalled track record of success working with public sector organisations to future-proof their business services through accelerated, intelligent technology.

Our success has been achieved with DEFRA, the Nursing and Midwifery Council (NMC), Nursing and Midwifery Board of Ireland (NMBI), Office of Rail and Road (ORR), The Pensions Regulator, The Water Services Regulation Authority (Ofwat) and non-departmental public bodies such as HS2.

Our dedicated project teams of subject-matter experts and in-depth knowledge of best-in-class Microsoft Cloud Technology are key success factors in effectively enabling digital transformation within the UK Public sector.
