

CLOUDTIME

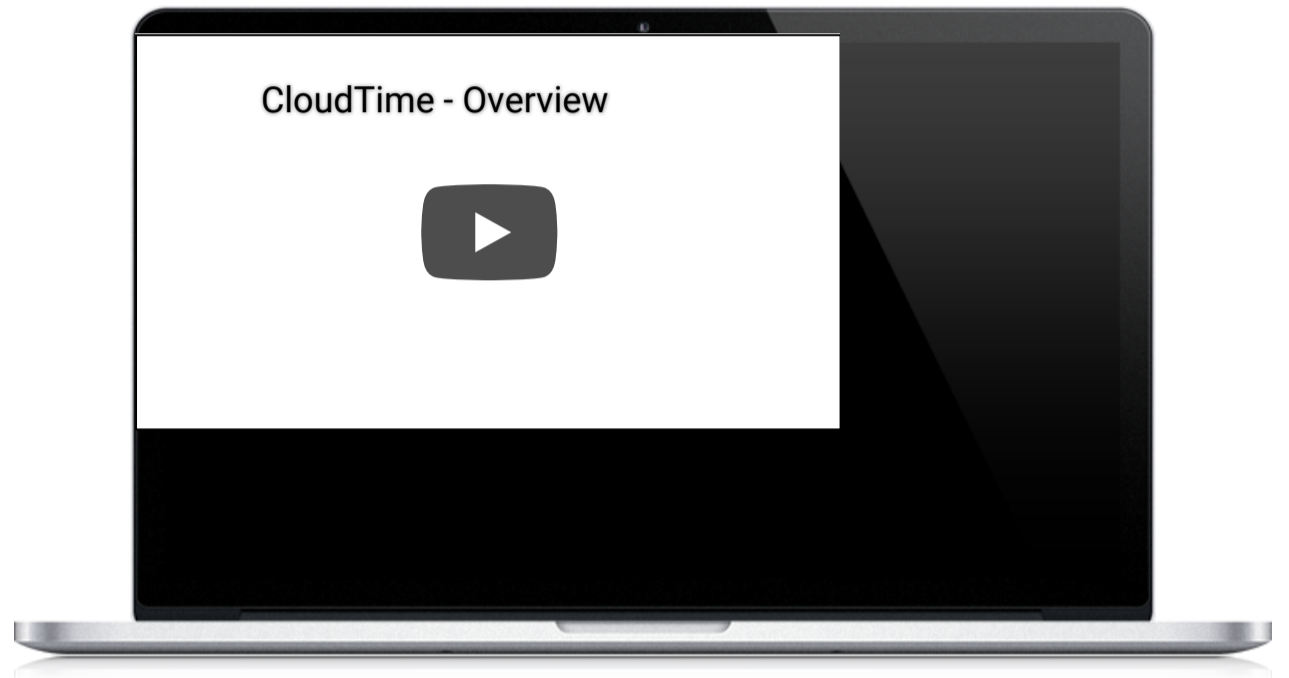

Reduce your Cloud billable Time

What is it?

CloudTime allows you to schedule your AWS resources to be shutdown when not in use, then restarted when required. Doing so for just a few resources can save hundreds of dollars a month on your AWS bills.

- ✔ Explore and find expensive AWS resources
- ✔ Schedule shutdown/delete for quiet periods
- ✔ Catch new resources automatically
- ✔ Software as a Service. Nothing to install
- ✔ Billed through the AWS Marketplace
- ✔ Only \$0.02 per shutdown or startup
- ✔ Your first 100 actions are free

FEATURES OVERVIEW

Some of the features that will instantly reduce your AWS bill

FIND EXPENSIVE RESOURCES

Explore multiple AWS accounts and regions simultaneously to locate your most expensive resources quickly.

SCHEDULE DOWNTIME

Schedule your resources to be shutdown automatically during quiet periods then restarted again.

CATCH NEW RESOURCES

Schedules can automatically apply to newly created resources that (do not) match specific tag criteria.

AWS IAM SECURITY

SEARCH AWS

EC2, RDS AND MORE

[Contact Us](#)

CloudTime's access to your AWS resources is managed through the AWS IAM that your AWS administrators control.

Search across multiple AWS accounts and regions simultaneously. Find expensive resources thanks to our automatic highlighting of unused resources.

Pause your EC2 instances, RDS instances and clusters. Delete unused ageing EBS volumes, snapshots, RDS snapshots, AMIs. Delete unassigned Elastic IPs

EMPOWER YOUR USERS

Invite your colleagues to CloudTime and allow them to manage their own resources and schedules. Role-based access control and AWS IAM security requires you to assign only the limited permissions they need.

NO INSTALL OR CONTRACT

Software as a Service with nothing to install. No credit card to produce or contract to sign. Billed through the AWS marketplace.

TRY FOR FREE

Your first 100 scheduled actions are free so you can try with no cost or obligation.

See these features in action in our [product overview video](#) on YouTube.
