# CLOUDVERSE

MULTICLOUD COST MANAGEMENT
REIMAGINED

A simple, granular, enterprise-grade multicloud management platform with visibility, allocation, optimization and cost governance.

Reduce **35%**
on Cloud Spend

Gain **20%**
on Team Productivity

Cut **100%**
on Cloud Silos

OUR KEY FEATURES

Asset Visibility
Connect multiple cloud accounts, configure assets, integrate applications & products.

Cost Optimization
Detect cost drivers, overtime, efficiency score. Realize, forecast and optimize overrun budget

Governance & Control
Identify idle, wasted, oversizing resources. Recommend potential savings, take prompt actions.

Configuration & Automation
Provision and manage IT infrastructure. Configure and deploy all infrastructure components quickly and consistently.

Finance Management
Identify, measure, monitor, and optimize finances through different perspective with cost allocation and showback capability.
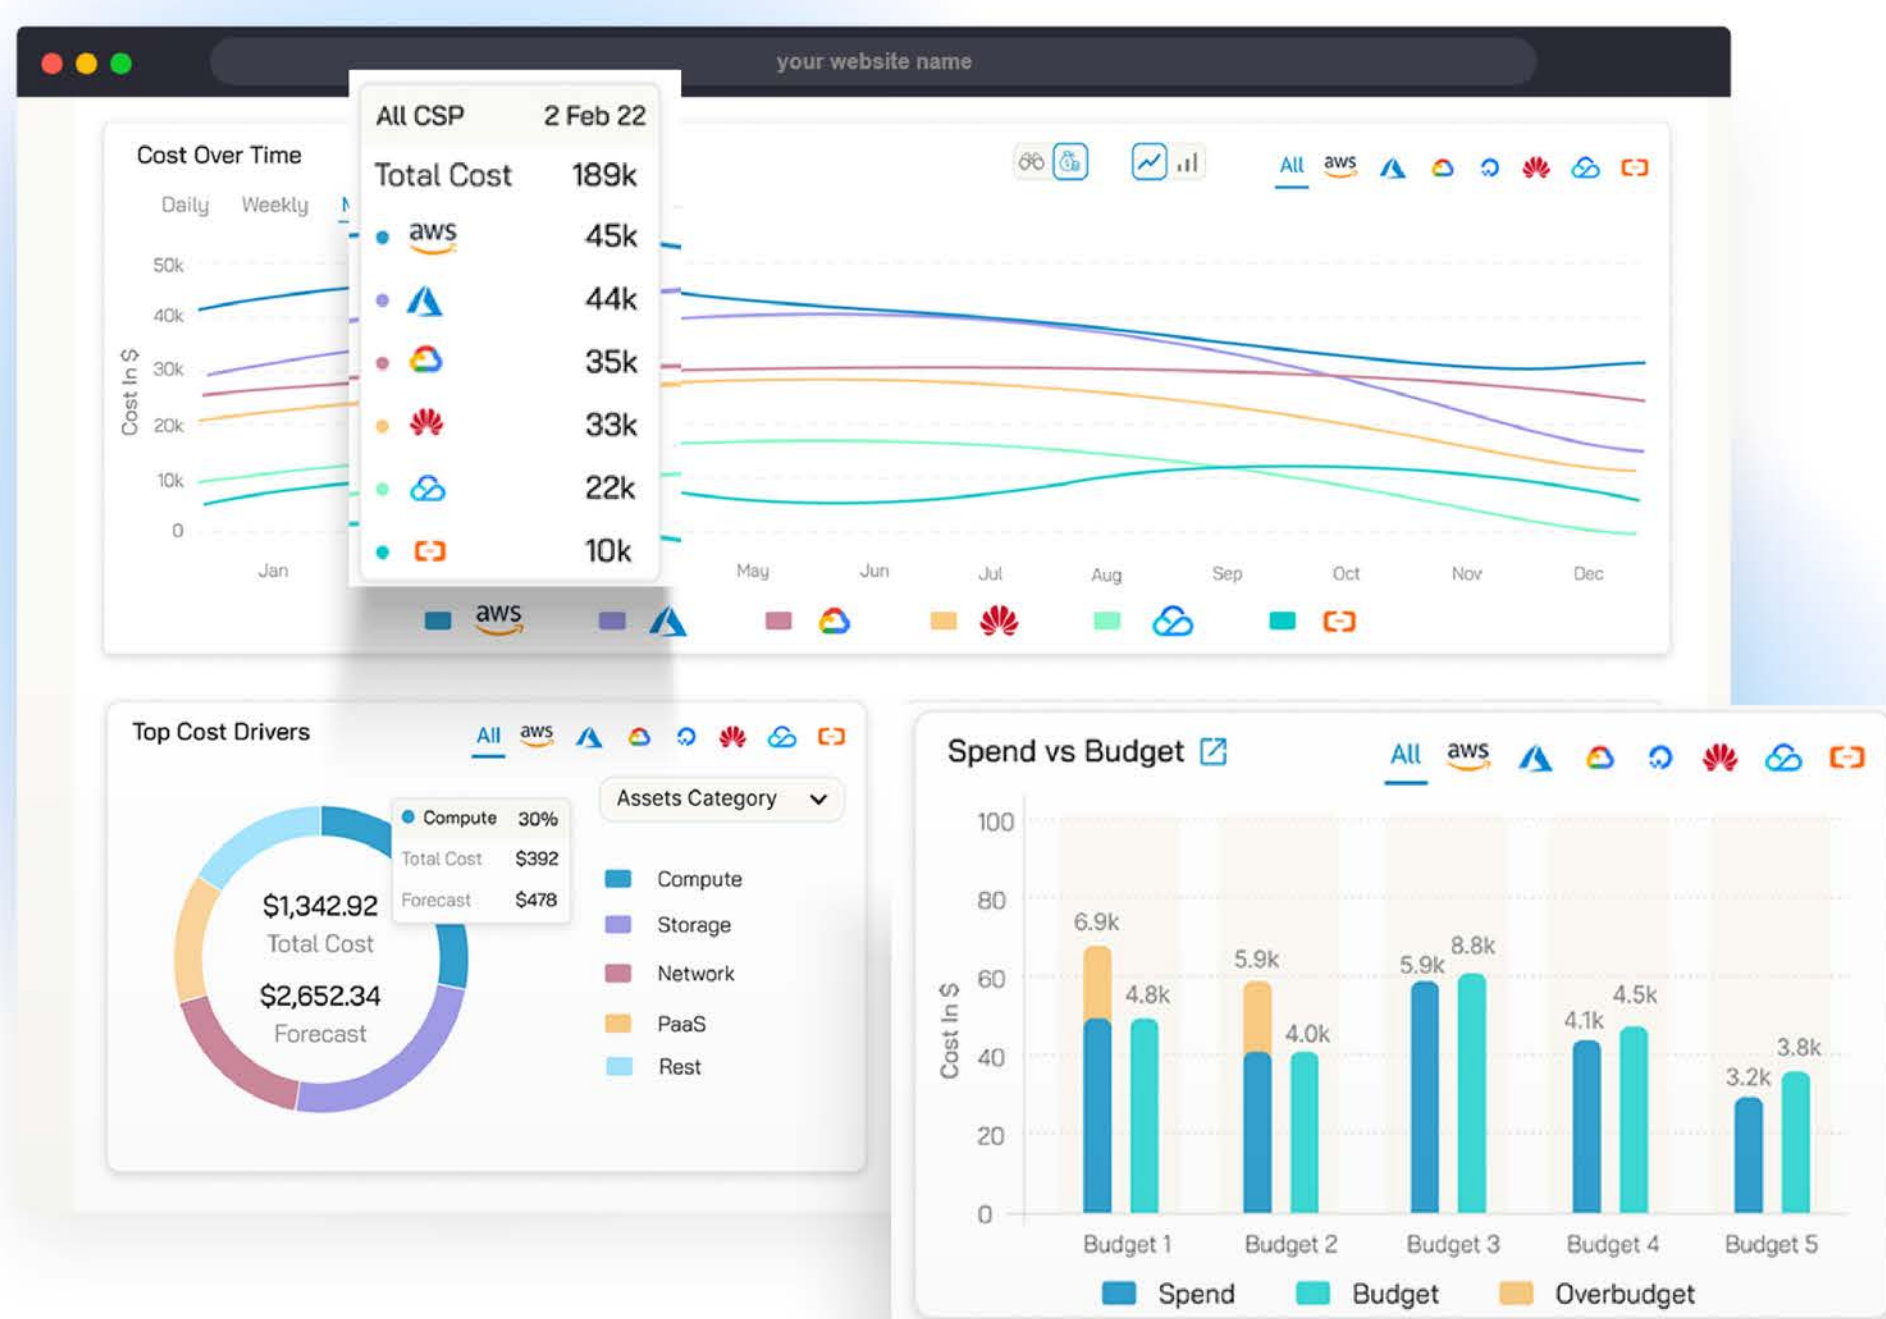

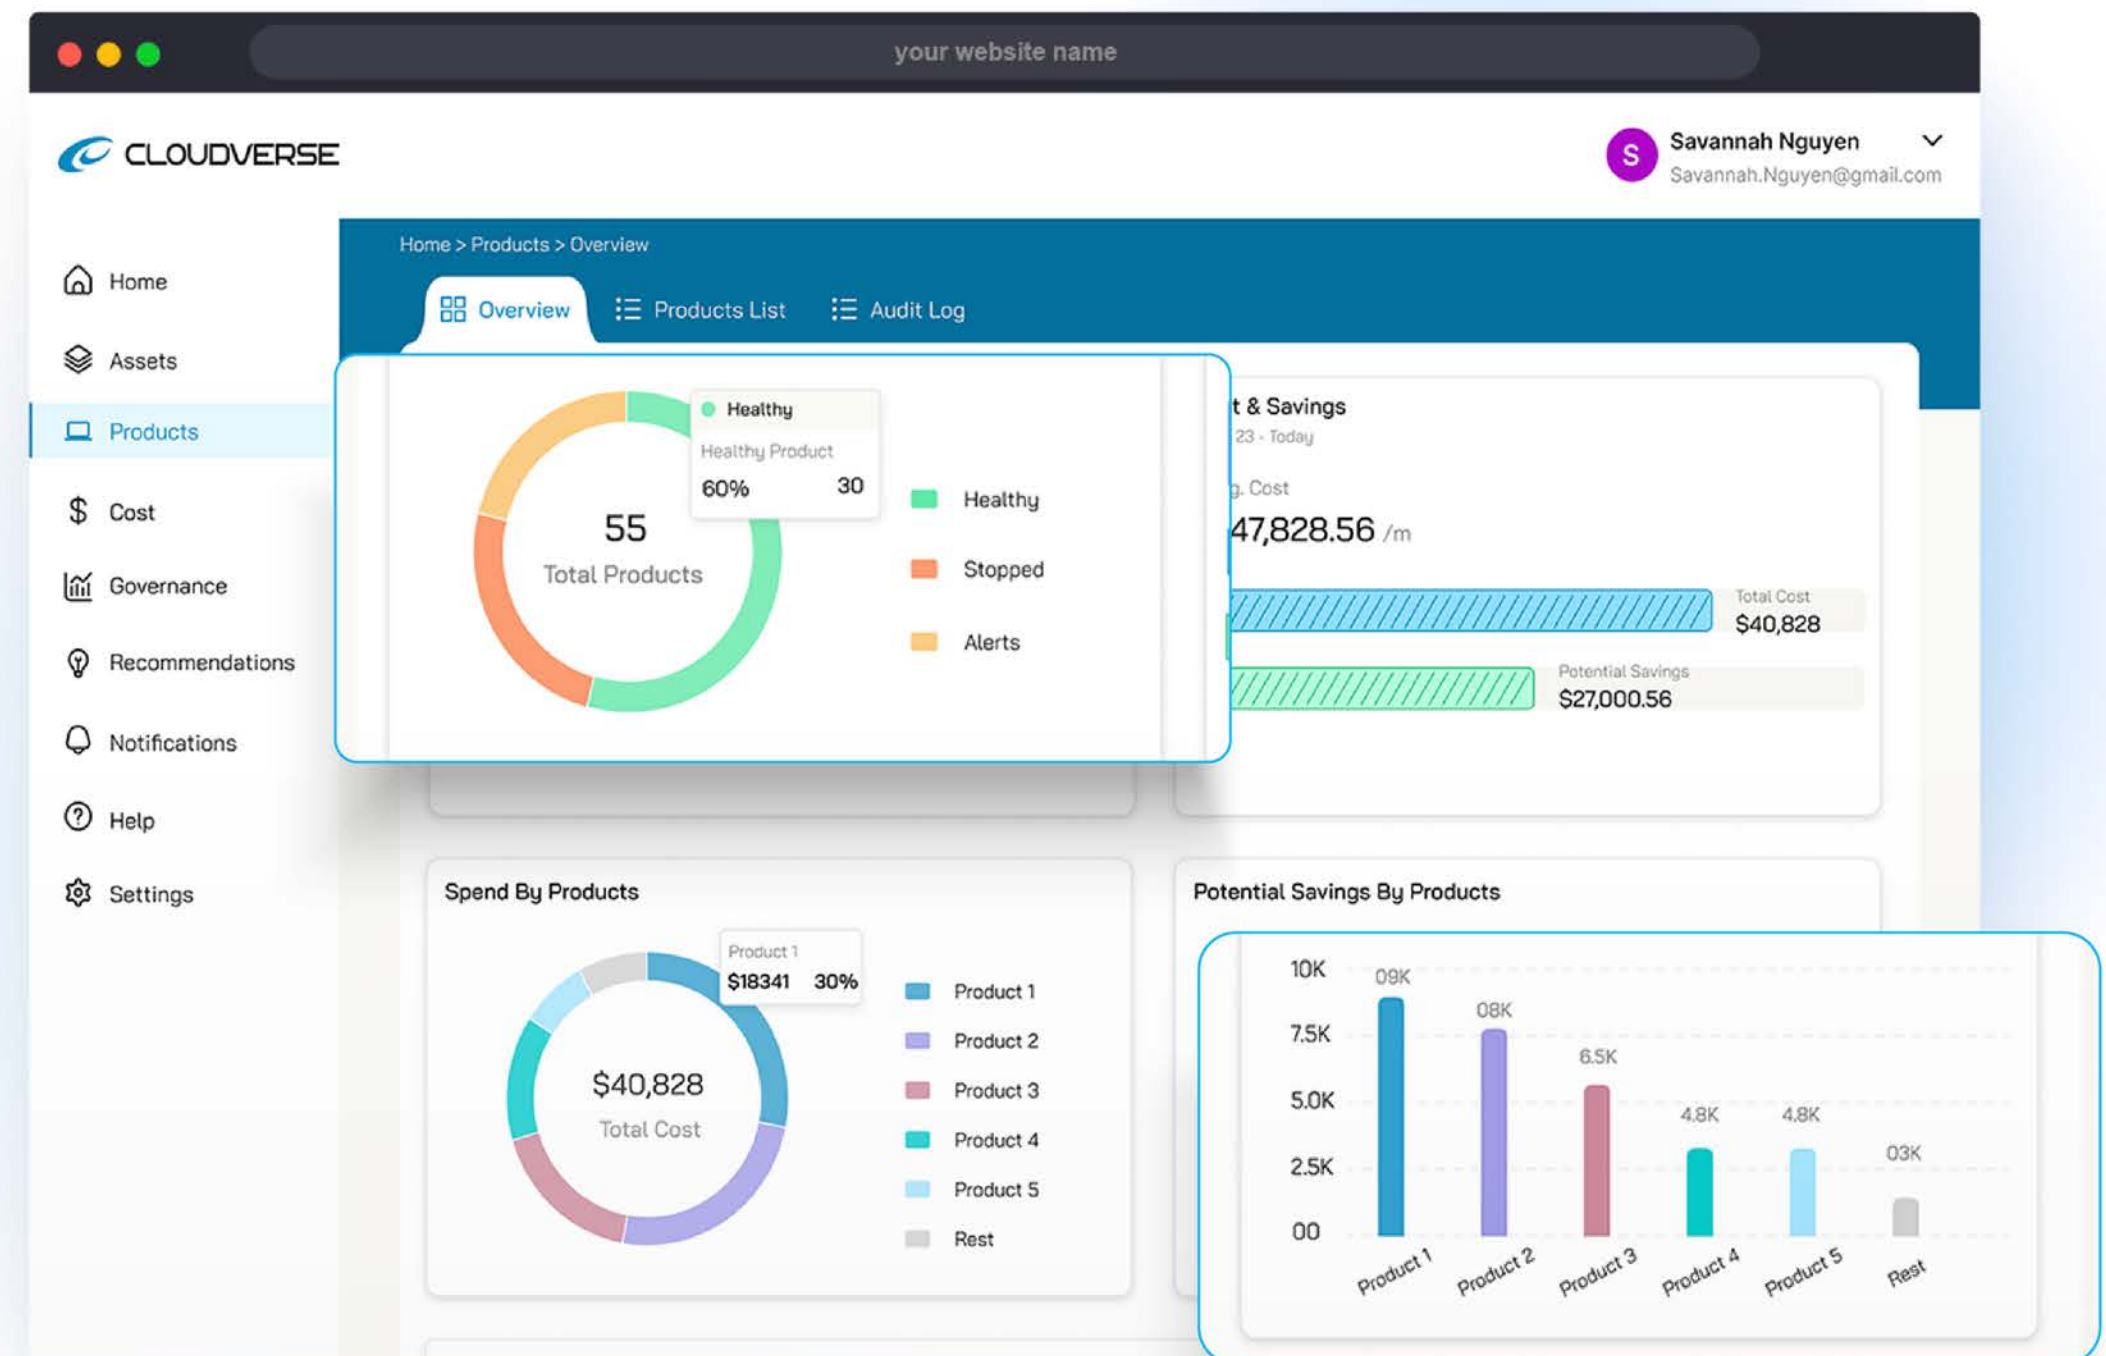

Security & Compliance
Breakdown resources into individual accounts. Segregate cloud workloads. Reduce shadow IT, assure security.

CLOUDVERSE

PLATFORM OVERVIEW

Managed cloud cost, perfected at scale

- Integration with top cloud providers
- IaaS, PaaS and SaaS discovery across clouds
- Cost analysis via historical data
- Full asset view in a single dashboard
- Cost anomaly detections
- Cost allocation and show back views

Reliable and risk-free cost & budget centralization

- Cloud usage & trend analysis
- Cost time-series forecasting
- Alerts are associated with budgets
- Budget monitoring at multiple levels

By | Resource | Account | Department | Region

- Cloud cost optimisation recommendations
- Alerts on potential budget overruns & thresholds notification

# Governance, risk, and compliance in check

- AES-256 data encryption
- Real-time cyber risk detection
- Annual penetration testing conduct
- Industry best practices & security frameworks
- Absolute client networks privacy
