Cloud Journey & Microsoft Tenant Review

Microsoft 365

Overview

At Cobweb, we offer a comprehensive range of services to help you gain a better understanding of your current IT setup. The options include our Cloud Journey Workshop, our Tenant Review and our Tenant Review+ service.

The Cloud Journey Workshop

Our Cloud Journey Workshop is designed to identify where your business is in its IT journey and determine the necessary steps to become a fully cloud-native organisation. This includes creating a roadmap with milestones, timelines, and estimated costs.

A workshop based discussion on:

- Business/Office networks
- Client devices
- Server infrastructure
- Applications
- Cloud services
- Current business challenges and goals
- Existing services and dependencies

A Strategy Report highlighting:

- Recommended cloud design and roadmap
- Key considerations and dependencies
- Migration paths and project costs
- Licensing and on-going optimisation
- Training and managed service options

cobweb

Review options

Tenant Review – Our Tenant Review is a more in-depth examination of your existing tenant configuration, aimed at identifying any gaps or weaknesses in your current setup. This analysis can help you formulate a plan to improve your security and add new features, and even migrate additional services to Microsoft 365.

Tenant Review Plus – For a more interactive and educational experience, our Tenant Review Plus service combines a comprehensive report with a workshop. This workshop is designed to educate your team internally and encourage open discussion, Q&A sessions, and create an actionable plan to achieve your goals in Microsoft 365.

	Microsoft 365 Tenant Review	Microsoft 365 Tenant Review +
