

SHAREPOINT HOMEPAGE SPRINT

Short Description

This 2-week sprint delivers a modern, branded homepage in SharePoint Online, aligned with Microsoft Viva Connections in Microsoft 365. Cocentric provides design, build, and adoption support to ensure your homepage works seamlessly in the Microsoft 365 environment, giving employees a mobile-ready, connected experience.

Overview

A homepage should be the anchor of your intranet and Viva Connections. In just 10 working days, we design and build a clean, audience-aware SharePoint homepage with governance and training built in. We create a wireframed design, build and configure the page, and provide an editor handover so your team can run it with confidence.

The sprint extends your Microsoft 365 platform by surfacing news, links, and dashboards through Microsoft Viva Connections.

What you get

- Tenant Discovery session and content audit
- Wireframes and component library
- Build and configuration of the homepage
- Content model and governance guidance
- Accessibility and performance checks
- Handover session with training and run-book

Outcomes

- Priority Mobile-ready homepage aligned with Viva Connections
- Content owners trained and self-sufficient
- Baseline reach and click-through measured

The result is a homepage that enhances Microsoft 365 by connecting SharePoint and Viva into one seamless experience.

Timeline

- 10 working days
- Customer effort: 6–8 hours

Why Cocentric

- Balanced design, governance, and performance
- Built with Viva Connections in mind

Pricing Structure

Pricing is based on a standard 10-day sprint, with additional charges for extra design iterations, advanced accessibility requirements, or integration with complex intranet environments.

Additional Information

Note: The price and timeline of the engagement will depend on the complexity, company size, and overall scope of the implementation.
