Projection

Marketplace, Pick Up Delivery Service, Auction, Inventory backend & mobile

2019

2021

2017

2020

2022

Mature

Activo Ver 4.0, CMMS Module, Inventory Module Tracking with RFID & GPS

Sustain on the market

Activo X, SaaS, Multiplatform, Portal

Problems to solve

1 Manual Processes. Human error from repetitive tasks, slow service to end user.

3 Cost & Risk. Inaccurate asset data. Unproven compliance with regulations.

2 Disconnected tools. Tool gaps are filled by manual processes from register to disposal.

4 Improve task for tracking, keep assets up to date in the lifecycle.

Product objective

Benefit of ACTIVO on single platform. Support fixed asset lifecycle management and strategic decision making.

Dashboard

01

ACTIVO X is supported by an interactive dashboard report. Users can personalize the dashboard according to their needs.

Client Implications:
The flexibility of the dashboard display makes it easier for users to read reports in the system. Reports become simpler & more attractive.
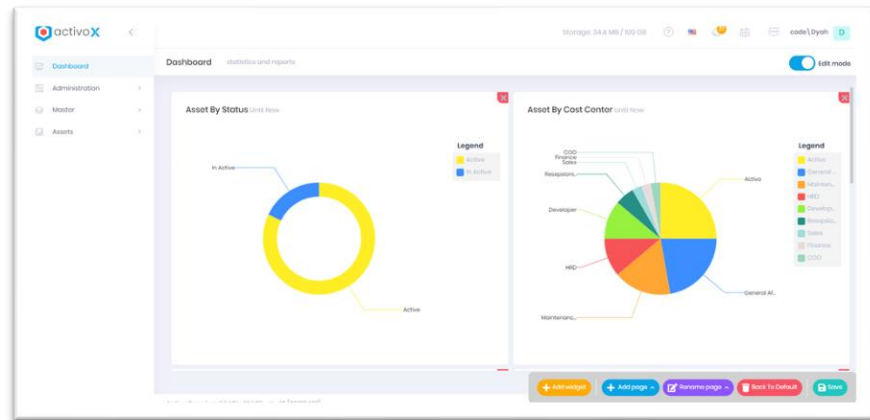

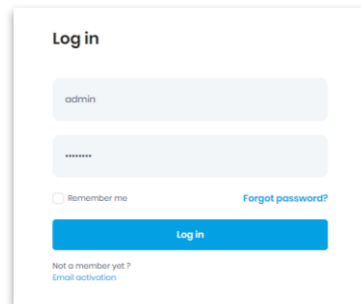

Secure

02

ACTIVO X already supports systems with a comprehensive level of system security by accommodating Captcha & Two-factor Authentication security.

Client Implications:
By implementing Two Factor Login Authentication, users who will log in will be asked to enter a Security code in the form of an OTP code that is sent to the email of a user who has registered with Activo X.
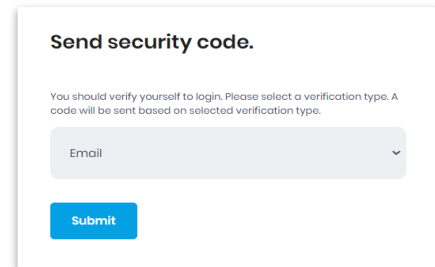

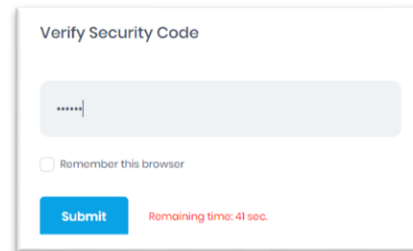

Register

03

Simplify the process of registering assets to the system, an easy process with good user experience and support for uploading data via excel

Client Implications:
Asset registration is easier to do with the support of an attractive user experience and supported by the ability to upload data
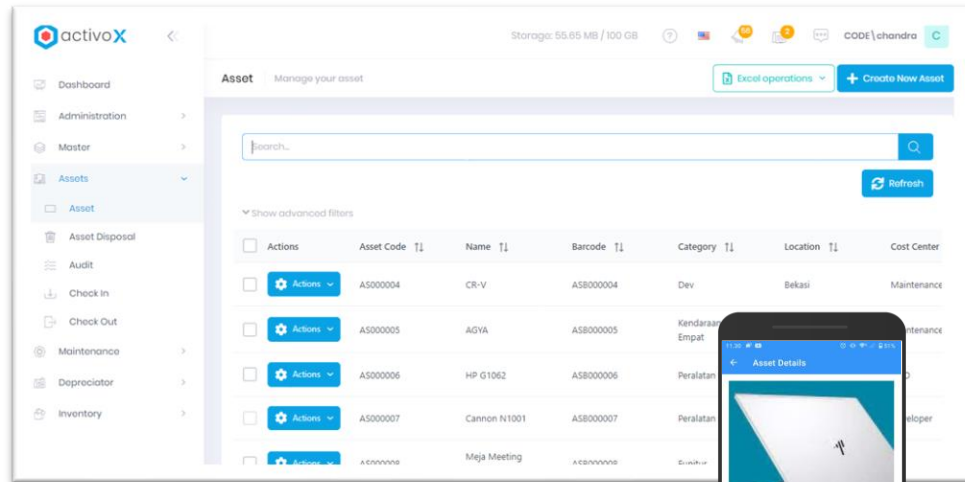

Audit

04

Asset Audit on Activo X can be made on a scheduled basis with a start and end period. So that the audit process can be controlled properly.

Client Implications:
the audit process can be more easily carried out and scheduled, as well as easier to monitor. Prove accuracy with scheduled audits
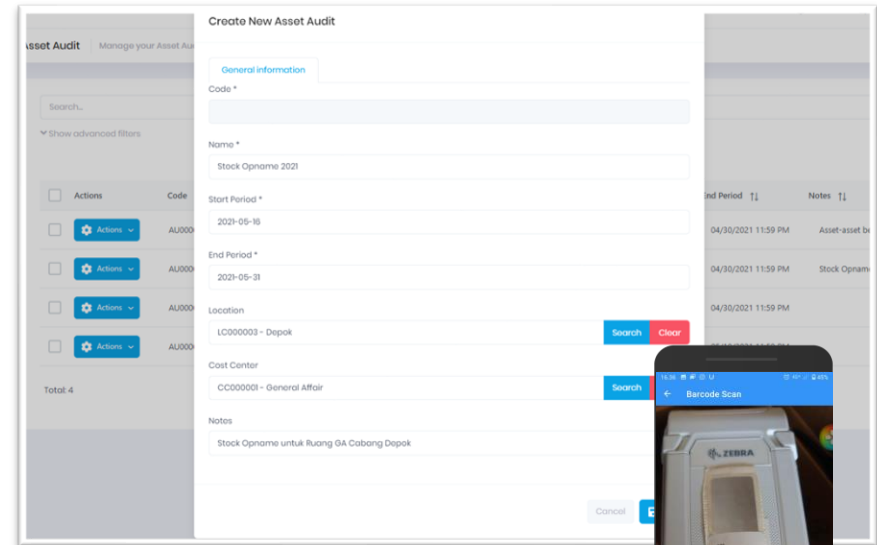

Check in/out

05

Asset check-in and check-out are features that are used to transfer assets along with the choice of the courier who will make the delivery.

Client Implications:
the process of moving assets from one location to another is more well monitored and has been supported by the ability to track delivery history
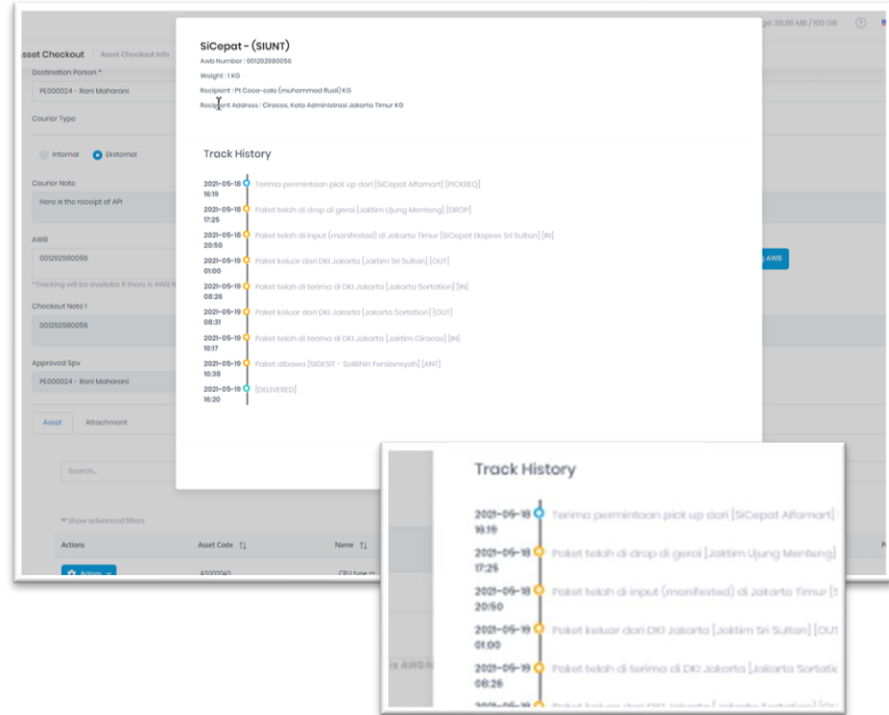

Depreciation

06

The process of calculating the depreciation value of each asset is done manually in Excel by adding a depreciation calculation formula according to the depreciation method used.

Client Implications:

the process of calculating the depreciation value of an asset can be done easily through the depreciation feature in activo x

Maintenance

07

ACTIVO X facilitates the making of preventive and corrective asset maintenance plans (requests) that will be shown to technicians

Client Implications:
Asset maintenance is more scheduled and monitored, so it can reduce the risk of asset damage before its economic life expires

Reporting

08

Activo x supports the process of generating various reports with simple and easy steps. such as asset reports, asset disposal reports, etc

Client Implications:
Report preparation process becomes faster and easier for users

Audit Trail

09

History audit trail helps users to track the process of changing data in the system, both asset history, or transaction activities carried out by the user

Client Implications:
Users can easily track changes in data in the system, changes in value, when data updates are carried out, and who makes changes to data in the system

Change logs : AS000004 - CR-V   ✕
