-

Full Product Management

TravelBooker travel agency software offers an end-to-end product management solution that includes flights, hotels, activities, transfers, car hires, insurance, and manual item flows. Manage rates, rules for prioritisation, aggregation, pricing, discounts, and promotions in real-time and let our inbuilt caching technology manage high volumes of search results intelligently.

.....

Admin Portal & Servicing Flow

Our travel agency software provides a centralised, user-friendly interface to manage and set up business rules, theming and reporting with user-level access management to fit your business objectives. Quote and booking management, shopping cart amendments are all powered by a complete servicing module that enables agents to convert, amend, pay or cancel bookings instantly. Each booking is structured as a super PNR where servicing can be applied to the entire booking, package, or individual component level.

.....

H2H, GDS & Other Integrations

You can connect to our library of Host-to-Host (H2H) connections via the TravelBooker travel agency software platform (the travel agency must obtain respective client accounts). Then, activate the required connections, including Flights via GDS, LCC, flight aggregators, hotels, transfers, activities, car hires, insurance, and ancillary services. With our travel agency software, agents can also add externally sourced manual items without a hassle.

.....

B2B, B2C & Corporate Solutions

With our travel agency software, CodeGen offers a full product suite to facilitate B2B, B2C and B2E (corporate) travel agency operations via the TravelBooker all-in-one technology platform. In addition, our B2B partners can enable the additional features of B2C and the corporate booking tool on request at a supplementary fee. Make your products available to your customers online and scale as you grow with us.

.....

Support & Hosting

TravelBooker travel agency software is offered as a SaaS product, thereby taking care of all your hosting needs at no additional cost. We provide 24-7-365 support for your business operations, including online interactive help, a chat assistant and a helpdesk. In addition, all our partners will have access to the most recent updates and new community features released in line with our product roadmap.
