

Modern Work

# SAP S/4HANA Platform on Azure

Fully managed and supported cloud  
platform tailored for your S/4 HANA  
Deployment

# Freedom With SAP On Microsoft Azure

SAP S/4 HANA on Azure is your own instance of SAP S/4 HANA, on Microsoft's Azure cloud platform. It allows users to access the platform anywhere, on any device without the need for local hardware, and with setup, access, backup and 24/7 support rolled in.

## Primary challenges

It is challenging to scope and deliver a robust, scalable, and secure platform to host S/4 HANA, as it requires both SAP and Infrastructure expertise to get it right.

## Ideal solution

SAP and Microsoft expertise with Codestone, who can provide a fully-managed, secure, and resilient Azure platform using our wealth of knowledge and 25+ year heritage.

## Desired outcomes

- Realise the benefits of:
- A resilient platform from any location
  - Predictable costs
  - Quicker and more reliable connections
  - A more secure network
  - Guaranteed uptime

# How Can SAP S/4HANA Platform On Azure Help You?

Delivering SAP via Azure Virtual Desktop (AVD) results in a highly secure solution that presents the maximum flexibility for hybrid working while ensuring your valuable data is kept secure.

## Say Goodbye to Physical Infrastructure

Turn CapEx into OpEx, and benefit from not having to own, power, maintain, and refresh your own hardware.

## Flexible Access Supporting Hybrid Working

Achieve flexible access via application streaming or from any smart device with a modern browser. You'll be able to display full SAP application in any HTML5 browser tab.

## Harness the Full Power of Azure

Robust back up and disaster/recovery capabilities, advanced networking, and Security built-in as standard, results in an enterprise-level platform.

# Codestone + Azure + SAP S/4HANA Platform

Codestone is SAP's multi-award winning & number one partner in EMEA North. It is highly experienced across multiple industry sectors, delivering rapid implementation projects alongside complex international rollouts.

## Fully Supported

Codestone offers a 24x7x365 fully managed and supported, UK-based, scalable platform for your SAP application.

## Easy To Scale & Upgrade

Use Microsoft Azure to suit your needs with a scalable strategic solution. It can also be easily scaled up or down depending on demand.

## Always Hybrid

Regardless of location, whether at the coffee shop, at home or in the office, your hybrid workforce can access this solution from anywhere, securely.

# Customer Success: Tristel Builds A Global Business Using SAP On Azure

Tristel's growth led to increasing challenges when onboarding new entities to its on-premise infrastructure, which was reaching capacity. Coupled with the decreasing costs of cloud provisioning, it made sense to look at other options to best serve its regions from a technology perspective.

## ► Global Expansion Support

The move to Azure supports Tristel's global expansion, giving internal entities a reliable and consistent access to the robust cloud platform, while enabling new offices to be onboarded with ease.

## ► Costs & Usage Insight

Tristel benefits from predictable costs for its global cloud environment, without having to worry about unexpected issues, making cost control much easier to manage and forecast.

## ► Security & Uptime

Security and networking are improved, providing increased stability and 99.9% guaranteed uptime. As the connection speeds are quicker and more reliable, users have a much better experience.
