e-Schooling.

How it works?

- Provides to **all users**
- **Easily adapts** to the specific context
- All information will be analyzed by **AI**
- **Designed to simplify** and facilitate information entry
- Monitor all information at the **highest level**

Tools that simplify work, it's easier to do tasks without the feeling of obligation.

e-Class

It brings together tools that help teachers quickly access content and record information about students during class.

It's easier to prepare and deliver lessons.

Customizable and easily accessible timeline with documents, links and multimedia.

Lesson plans

Plan and share lesson plans. Organize and share training materials and exercises.

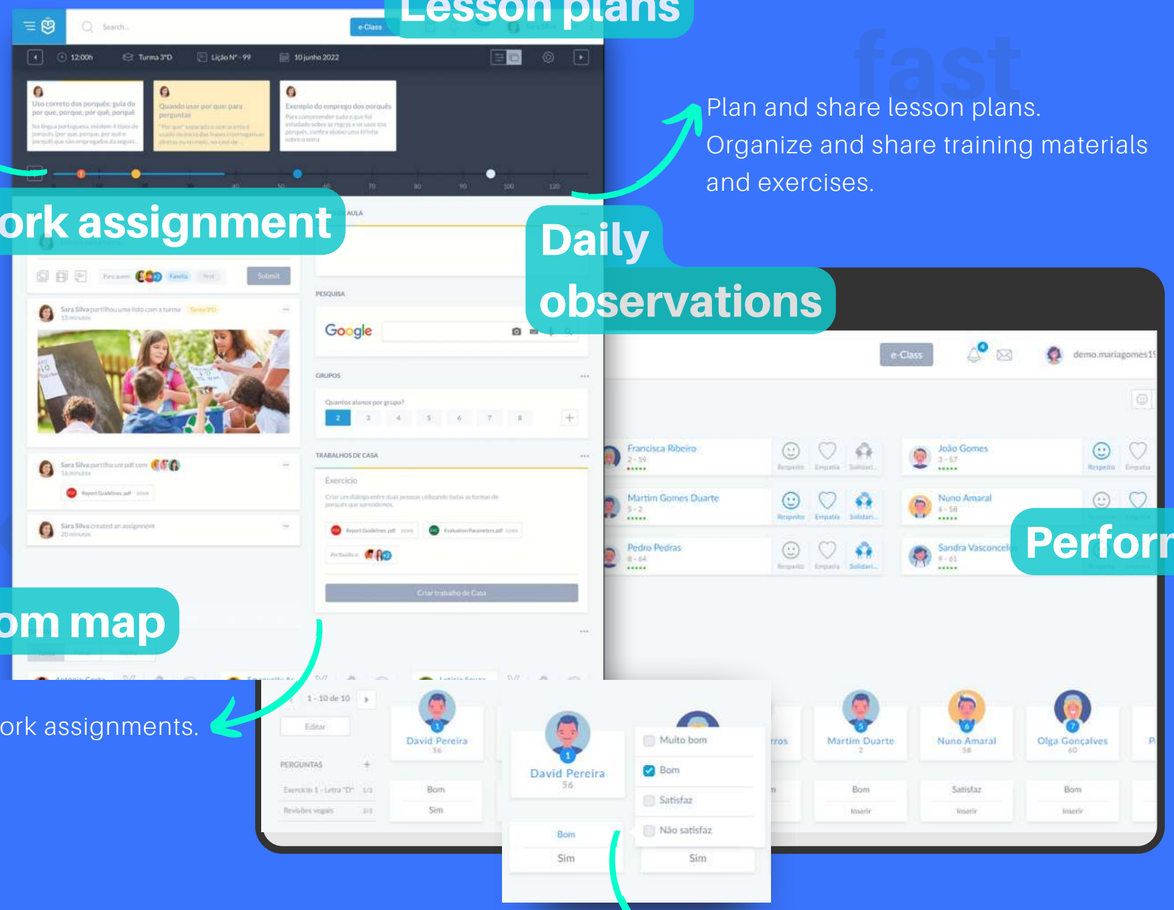
Homework assignment

Daily observations

Performance

Classroom map

Homework assignments.



Customizable and instant student performance records.

e-Docs

e-Docs brings together all content created or shared with the user. The content contained in this directory can be associated with events, such as classes or meetings.

e-Docs can be in the most diverse formats, images, text, videos or importing ready-made files in Excel, Word, PDF, Powerpoint.

flexile

The contents can be just for your consultation (private) or shared with students and/or other teachers

Lesson plans

Worksheets

accessible

Notes

Advanced search filter to quickly find what you need

Exercises

Create or upload the teaching materials you will use or simply create a note so that nothing is forgotten

Manuals

teaching material

Assessments

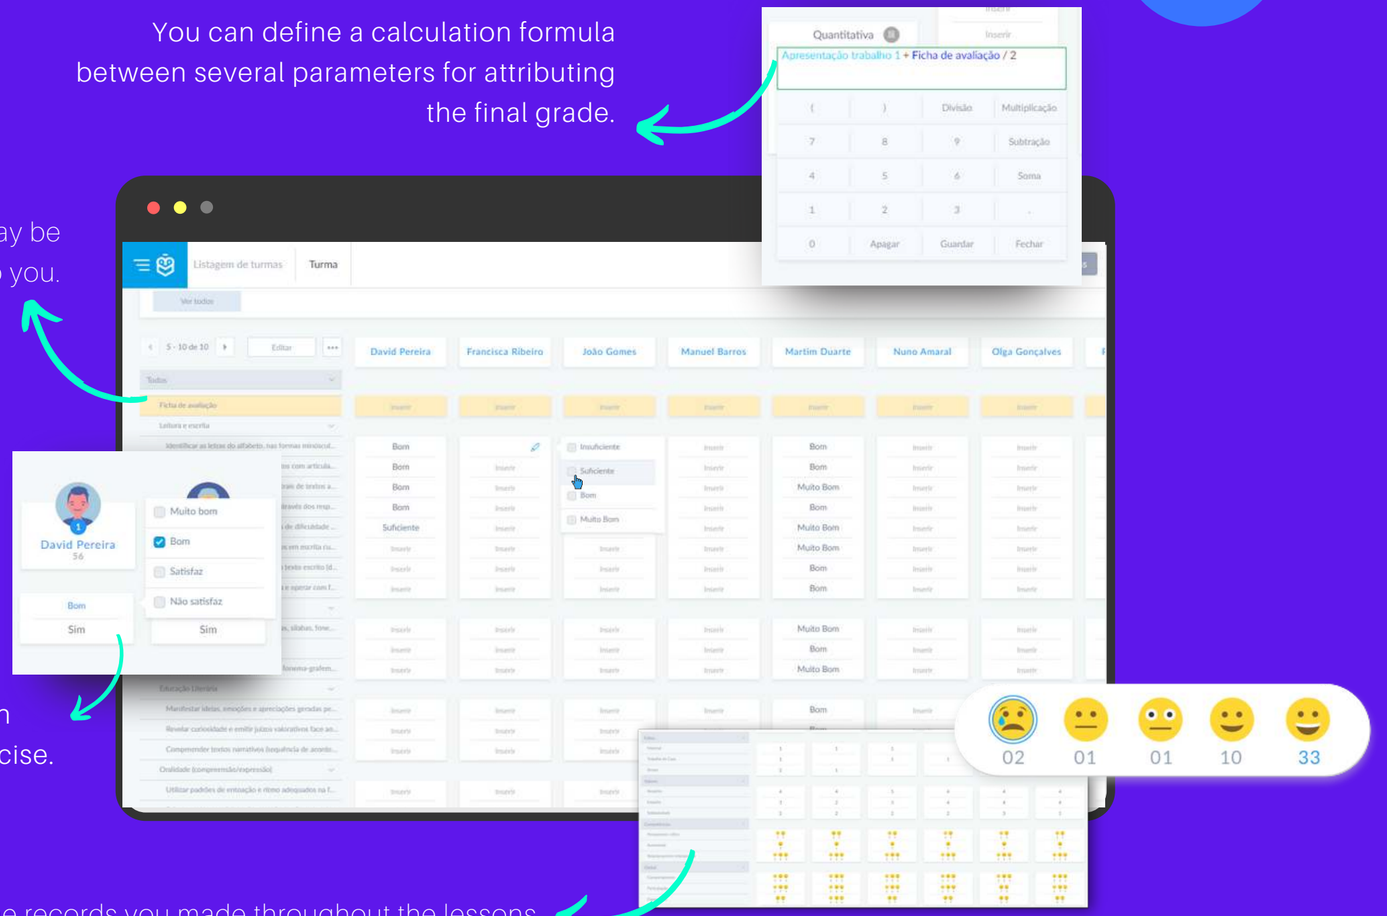
- Unify the evaluation records
- Ordered and adapted to fit each class, subject, or student.
- Teachers are empowered to set their own assessment parameters
-

You can define a calculation formula between several parameters for attributing the final grade.

Evaluation records may be visible only to you.

Record performance in each activity and exercise.

All the records you made throughout the lessons will be summarized in the evaluation grid so that the moment of assigning the grade is facilitated and in conscience.



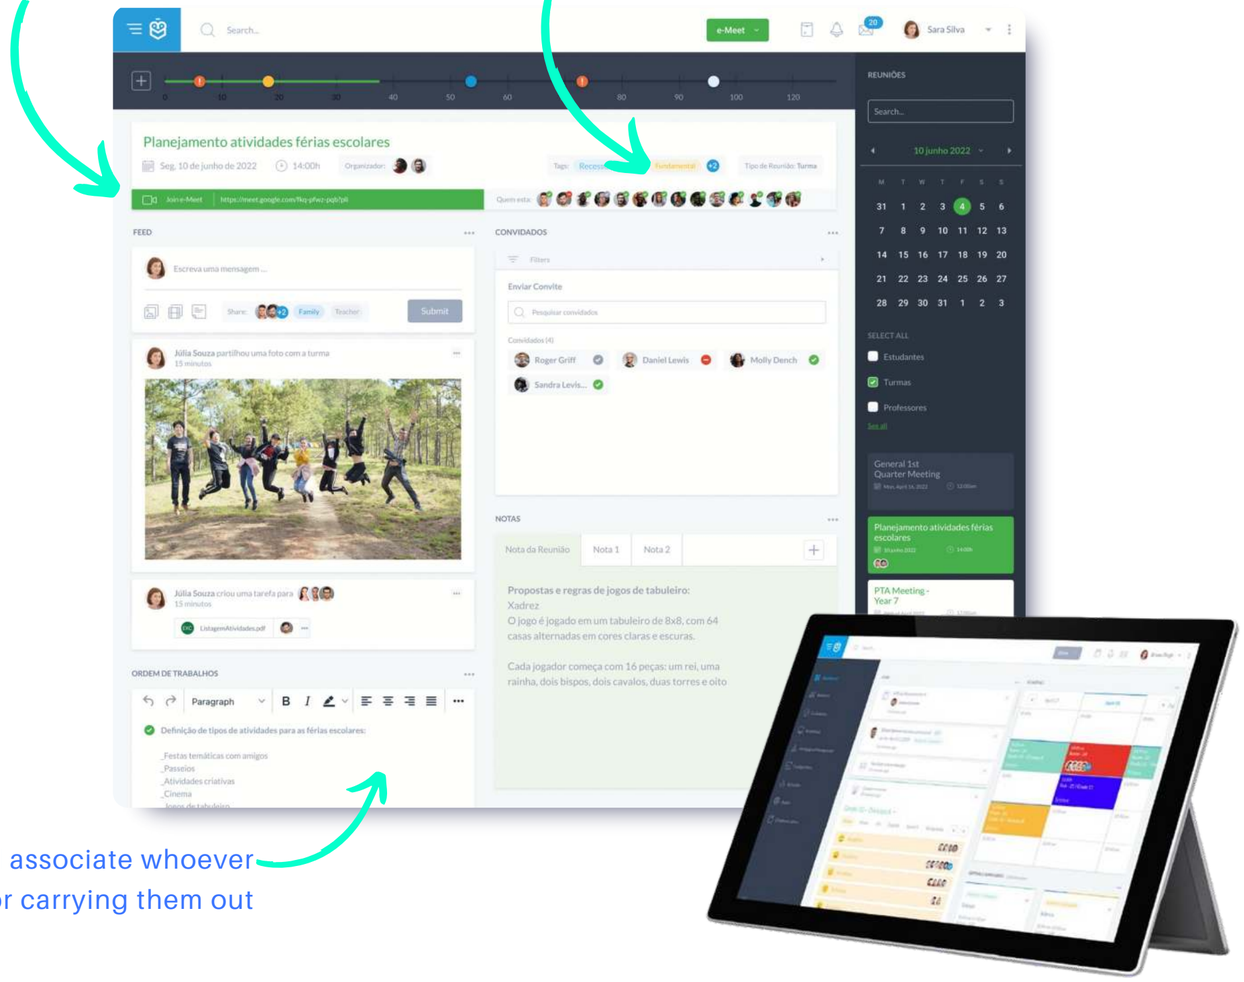
e-Meet

Ensure that all meetings are productive.

Plan, participate, record, share, discuss and analyse.

Access link for online meeting

Send meeting invitations



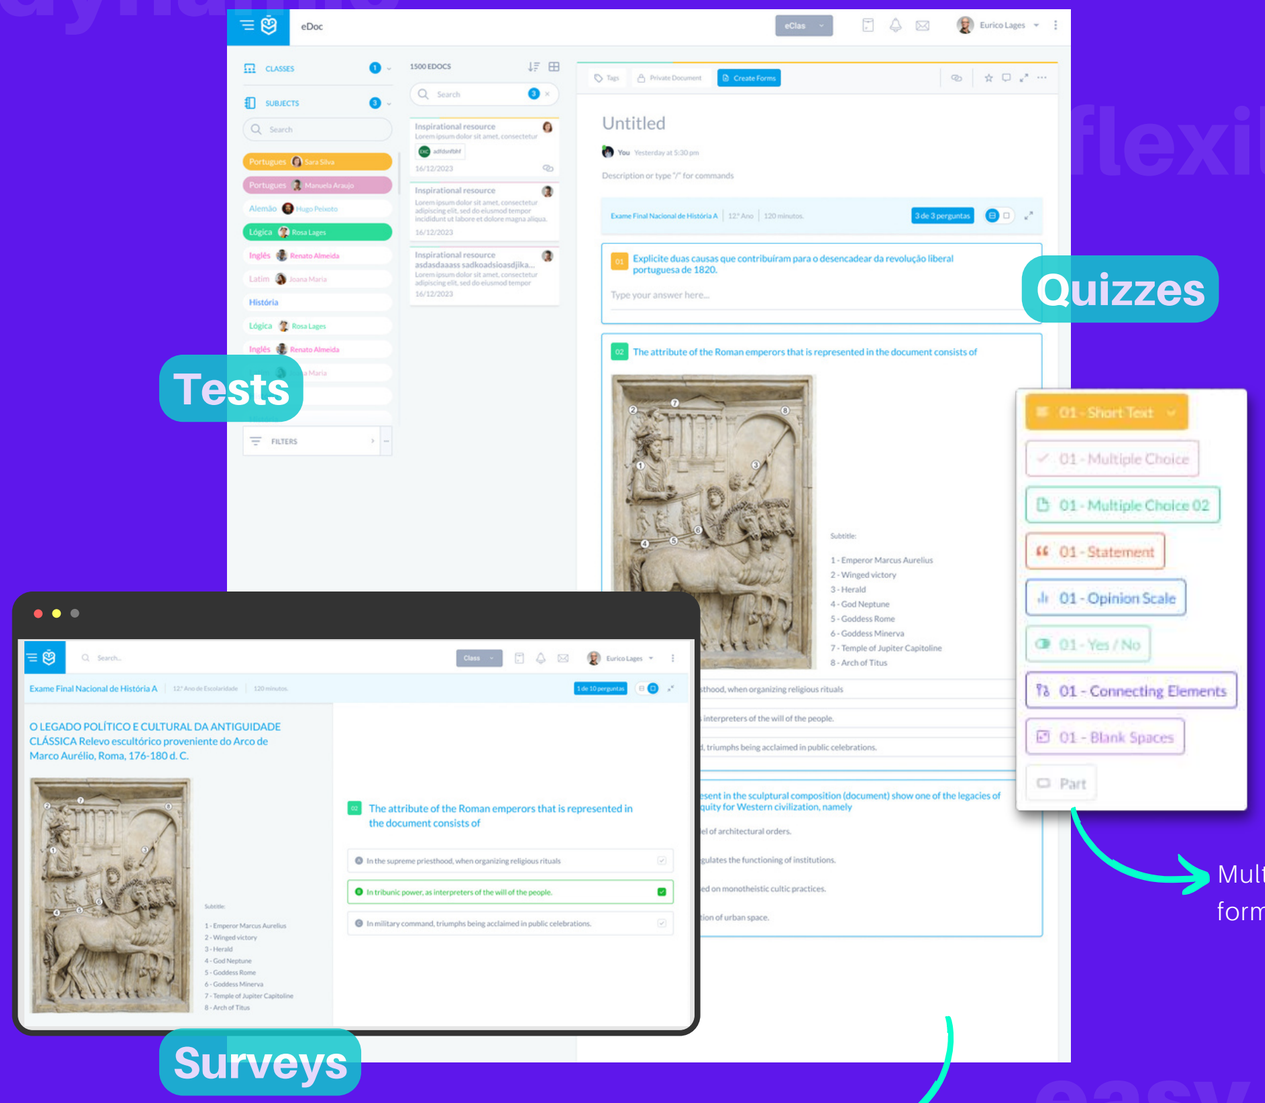
Register tasks and associate whoever is responsible for carrying them out

COMING SOON

e-Forms

A form system that allows the creation of questionnaires for assessment, consultation and exercise purposes, with the possibility of automatic configuration of response correction.

The most powerful tool for creating tests, dynamic surveys and quizzes



Multiple question formats

e-Forms can be integrated into any e-Schooling activity (For example e-Class, e-Docs).

Your school have a solution that you would like to integrate with e-Schooling? **WHY NOT?**
