SERVICES

Why Cogny

In high-stakes business environments, the emphasis on excellence and accountability often clashes with AI's lack of transparency and explainability. This forces skilled staff to spend hours and days manually searching, organizing, and validating information hidden in PDFs and reports.

Cogny breaks that trade-off

Cogny empowers knowledge workers with an operational, intuitive, and transparent AI-powered content analysis solution integrated into Excel. It instantly fills spreadsheets with qualitative or quantitative data, allowing talented teams to focus on strategic, high-value activities and achieve greater impact.

ADDED VALUE
