Product Brochure - Healthcare

Is your decision making fully insight driven?

Powered by AI to Operate At Scale

Artificial Intelligence = Amazing Insights

DataGenie makes it affordable and effortless for businesses to autonomously realize insight-driven decision-making at scale. and effortless for businesses to autonomously realize insight-driven decision-making at scale.

DataGenie uses AI and automation as a force multiplier to democratize insights, and break through siloed domain knowledge, making it easily accessible to business users across the entire organization.

Love at First 'Insight'

DataGenie is crafted with love for business users. Our customers are delighted by the simplicity of our TopStories, through which we serve complex and intricate business insights. Business users get answers to the questions they ask and more importantly also to questions they never asked but should have. Data professionals can now get out of the rut in maintaining basic reports and dashboards, to focus on more sophisticated analyses and high-value tasks like insight-enabling other departments.

Incredibly Easy

Simplify and automate the entire insight extraction process

AI Powered Autonomous Stories

Look beyond high-level KPI changes and time intensive analyst driven slice/dice & drill down by enabling AI-driven root cause analysis

Reduced Time to Action

Kill the back & forth between your business users & analysts by giving them all the detailed insights they need, right off the bat

Eagle's Visibility

Enhance the field of vision, intelligently baselining data, and mining unseen patterns

Democratized Insights

Align all organizational objectives with shared insights and metrics

Absolute ROI

DataGenie starts delivering insights in an afternoon. With zero learning, quicker adoption, and Genie+, business users can perform at their best in delivering a collective organizational success.

Farfetch has been harnessing the power of DataGenie across multiple use cases, including fraud prevention, marketing ROI, operations, omni-channel, FinOps, etc. Introduction of Genie+ is like having an analyst right at our fingertips, guiding our decisions through natural conversations. With this we anticipate an even broader adoption of DataGenie across our diverse business teams.

Michele Di Gangi

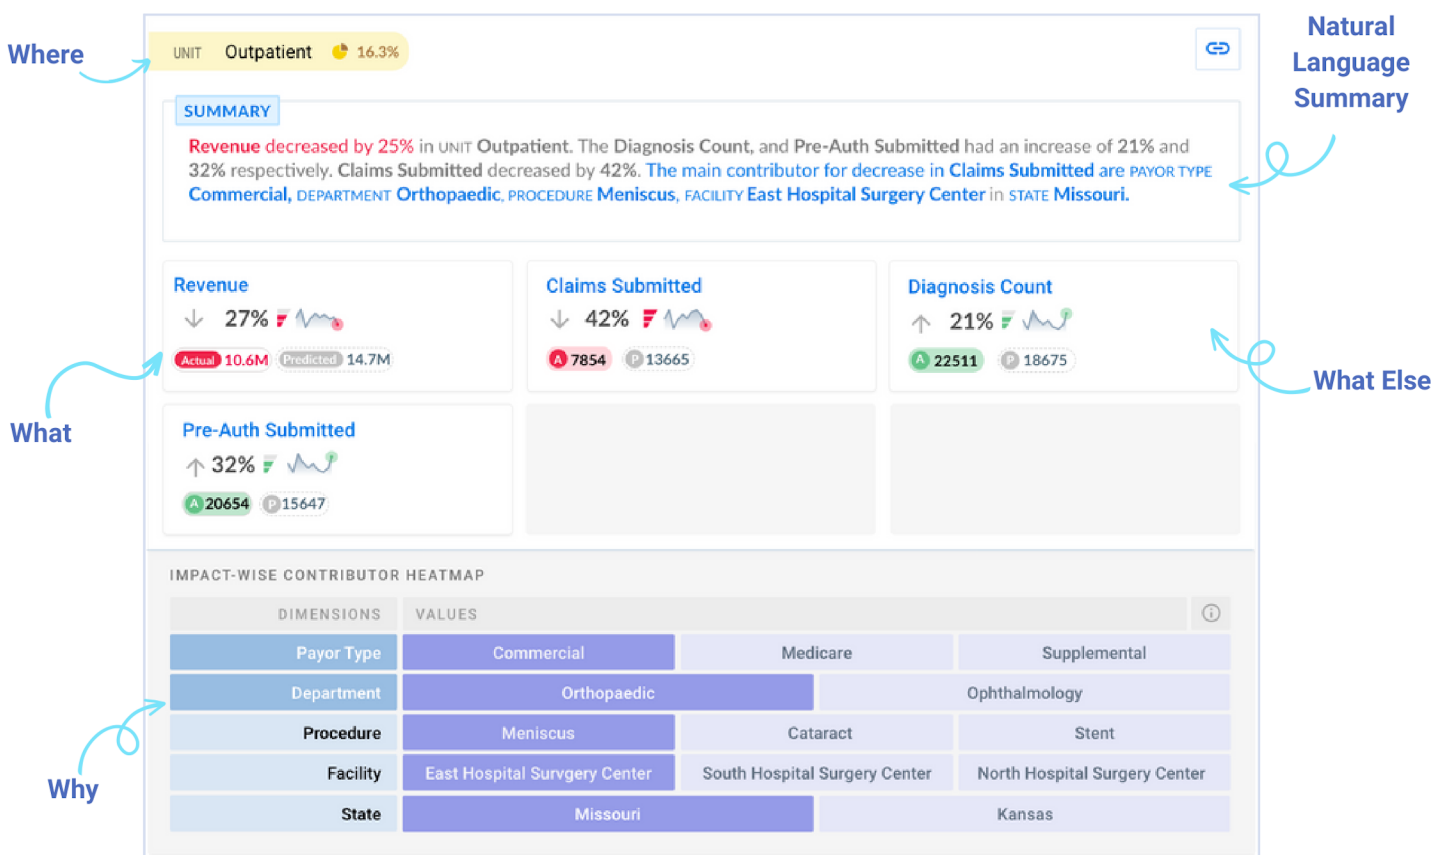

Vice President Data, Farfetch

See what's important Nothing Less, Nothing More

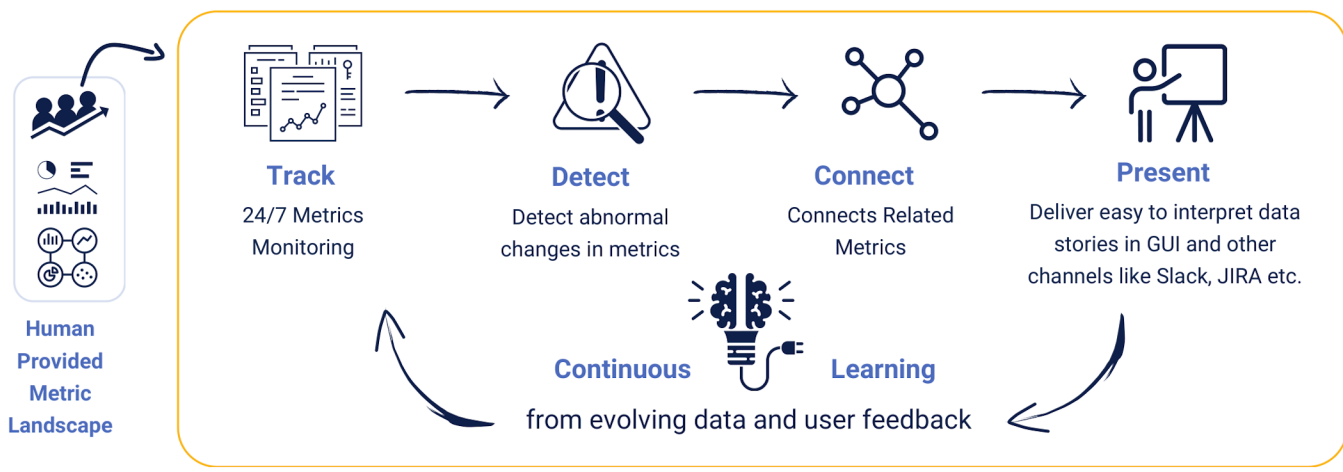

Numerous KPIs across several dimensions – leverage AI & Automation to cut through the clutter and focus on the ones that need attention

TopStories[®]

Think of it as a highly personalized version of "CNN top 10." DataGenie continuously monitors your entire business metrics environment, identifies and links the unexplained anomalies to key narratives, and autonomously presents them in order of business significance. Say goodbye to the hassle of creating, overseeing, and keeping track of countless pre-defined dashboards. Our dynamic TopStories provide your business users with precise, comprehensive insights – delivering exactly what's crucial, including the 'Where,' 'What,' 'When,' and 'Why' behind each issue.

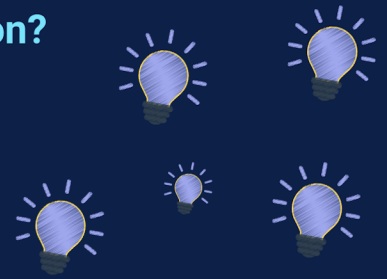

Get insights in an afternoon

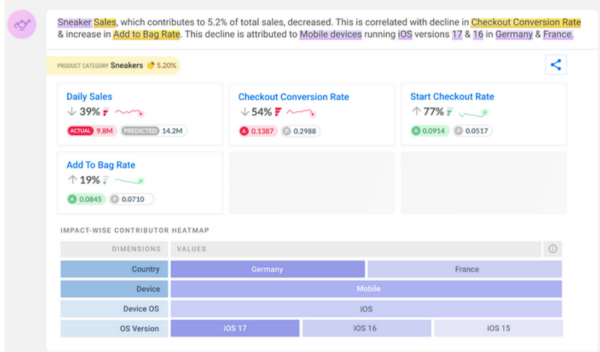

Insights strategy aligned with all of your organization?

Generative AI Features That Democratize Insights

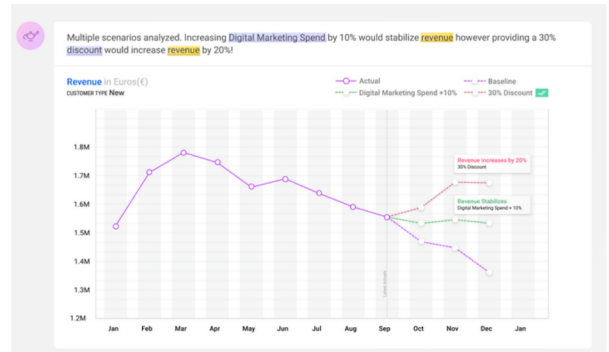

Generative AI democratizes insights, making data-driven decisions accessible to all team members.

Data Explorer | Forecasting & Scenario Planning | Guided Dashboards | Genie+ A Natural Language Interface

Autonomous Insights Through StoryCard

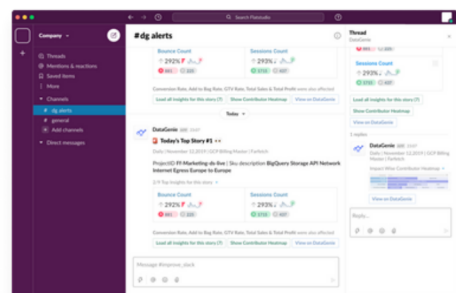

Forecasting & Scenario Planning

Guided Conversational Dashboards

Add dashboard components from a variety of datasets using simple queries

Downstream Channel Integration

Send automatic alerts to Slack, Jira, PagerDuty, etc.

As we expanded the use of an advanced cloud-based BI tool, we also needed to expand our team of analysts. DataGenie enabled us to scale our breadth and depth of Analytics faster by dramatically reducing the human effort involved, freeing up our skilled analysts from mundane & repetitive BI work.

- Kshitij Kumar,
ex-Chief Data Officer, Farfetch
