

Integration Assessment

From BizTalk to Azure Integration Services

In the ever-changing landscape of integration, Microsoft's Hybrid Integration Platform features BizTalk Server and Azure Integration Services (AIS). With BizTalk Server 2020 still supported and the impending end of support for BizTalk 2013 and 2016, Codit provides a concise assessment service.

The result is a detailed report that serves as a roadmap, guiding discussions and informing decisions for a seamless migration to AIS.

What We Will Do

- Assess current BizTalk Server setup and applications.
- Identify potential issues for Azure Integration Services migration.
- Engage in discussions with the integration team for insights.

Assessment Process:

- We will conduct a thorough examination based on the environment size.
- Duration determined before the assessment begins.

What You Will Get

- A comprehensive report post-assessment.
- A report of highlights challenges and potential pitfalls.
- A debrief about the report with the integration team.
- Future use of the report to estimate migration efforts and guide future setup decisions.
