Kickstart Your IoT

Kickstart Your IoT

Is your business flying blind using fragmented data to try and stay on top of a global workforce, tackle downtime, optimize business processes and somehow discover new revenue streams?

IoT can help you gain a competitive edge by unleashing untapped data to gain deeper insights into your business processes. You'll be able to act fast on high-level business decisions based on accurate real-time data.

IoT isn't just a technology, it's a whole new way of seeing.

Codit is here to help you design, build and run your IoT architecture. By partnering with us you'll get our in-depth expertise. We'll guide you through ideation, implementation, to running your solution using our best practices.

Where to start?
Are you ready for the next step? We are here to help you get going with IoT. Let's make it work for you and your organization. Step by step.

We've developed a kickstart program that unleashes the power of IoT for your business.
This is a seven-day track in which you will:
- Define a basis for your IoT strategy, business case and requirements for your IoT platform or solution
- Explore the capabilities of Azure IoT technology with a hands-on workshop
- Receive a detailed technical architecture and estimation for Azure consumption and realization of the initial solution. This will also include a scope of work
- Set up a first proof of concept connecting a real device to Azure and displaying real-time IoT data

Pricing
Fixed price (excl. VAT)

7.500 EUR
