Invictus™

Invictus™ for Microsoft Azure Integration Solutions

Invictus™ is a turnkey solution that accelerates your Azure integration projects, while offering consistency with reduced risk. Codit built the transparent and affordable solution Invictus™ based upon more than a decade of expertise in integration.

What You Get

Easy Implementation
Development teams no longer need to waste time building custom functionality on their Azure integration solutions.

Avoid Costly Pitfalls
Invictus™ helps you avoid costly pitfalls and ensures that your solutions are developed using the best practices of Microsoft.

Transparency
The Invictus™ dashboard is designed so that non-tech users can easily monitor your integration environment.

Faster time to market
By saving time on the initial groundwork your team can get to work on business-critical projects, accelerating your time to market.

"To help us speed up the development of our new hybrid system, Codit used Invictus™. Thanks to this software suite, I can get an overview of the integration in Invictus, which makes the ideal situation because we are the ones in control. It makes the hybrid solution more transparent. It also helps to speed up development. I oversee the number of interfaces built in last couple of months and it has gone much faster than traditional interfaces."

Jeroen Koppenaal, IT Director, Homefashion Group

What We Offer

Expertise	Support	Future-proof	Reliability

Why work with us

We'll walk you through your integration project from ideation to implementation to managing your solutions when in production. We have over 20 years of experience in integration, and we're the largest certified Microsoft Gold Partner in Europe in Application Integration.

Features and Capabilities

Process visibility
- Structure folders, flows, and data according to business needs.
- View processes and status of messages.
- Click through the detailed flow execution.
