SQL Server Migration

Sustainable and Secure

24/08/2022 V2

Why migrate SQL Server to Azure?

There has never been a better time to move SQL Server on-premises to Azure.

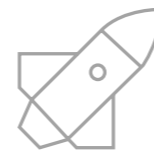

Organisations are looking to reduce datacenter costs, optimise business performance and accelerate green-IT initiatives.

Cloud services eliminate the need to maintain the product lifecycle of SQL Server saving valuable time and money.

Primary challenges

- SQL 2012 EOL
- Datacenter contract expiry
- Business critical data workloads
- Unsupported legacy applications
- Meet business sustainability goals

Ideal solution

- Industry-leading intelligence with performance tuning
- High availability and disaster recovery built-in
- Compatible with IaaS, PaaS and hybrid services

Desired outcomes

- Reduced TCO
- Defined cloud roadmap for SQL Server
- Reduced CO2 datacenter emissions
- Cloud infrastructure that enables business transformation

Azure SQL gives you the choice

Azure SQL is a family of fully managed, secure, and intelligent SQL database services that support a wide range of application patterns, from re-hosting and modernising existing SQL Server workloads to modern cloud application development.

SQL Server on Azure Virtual Machines

Infrastructure-as-a-service offering ideal for lift and shift scenarios with SQL Server compatibility and OS level access

Azure SQL Managed Instance

Platform-as-a-service offering ideal for modernising existing applications without the need to manage the OS layer

Azure SQL Database

Platform-as-a-service offering ideal for scaling modern cloud applications and gaining near real-time data insight

Coeo, migration services, and Azure SQL

Coeo are an advanced specialist Microsoft Data & AI partner, providing consultancy and 24/7 dedicated support.

Coeo can support your organisation to assess your SQL Server environment, support your migration with expert advice and bring SQL into your digital transformation journey.

Assess your SQL Server estate

Assess size, scale and compatibility of the current SQL server environment to provide a migration plan and best practice recommendations

Accelerate your SQL Server migration project

Cloud adoption framework aligned consultancy to migrate SQL Server workloads into Azure

Mitigate risk with expert consultants

Working together to share knowledge, experience and best practice advice to deliver a successful migration project

Customer success: Pantheon innovates with Azure

“We have found a trusted partner in Coeo and are delighted with the migration and on-going proactive management of our Azure platform.”

John Eggleston, Partner and Global CTO, Pantheon

▶ **Secure modern data platform**

In a highly-regulated financial environment, data security is key. Cloud architecture with a multi geo-location backup and recovery design always ensured compliance

▶ **Migration delivered on-time**

Business critical systems like valuations, trading, marketing and payroll were successfully migrated with a tight deadline and minimal downtime

▶ **Post-Migration Support**

The rapid change of Azure Data Services required skills that were not in house. Coeo provided a 24/7 Dedicated Support service, offering proactive advice and performance management
