ENABLE WINDOWS 365 CLOUD PC

WITH COFOMO AND MICROSOFT

Microsoft

90%

of organizations will combine remote and onsite working to embrace a hybrid model[1]

The ability of employees to connect to business data no matter where they are and from any device is a significant benefit in today's world, but it can open up your business to security risks. Enable your employees to do their best work on any app, device, or network—while protecting company data—by modernizing the way you manage every endpoint.

With the right endpoint modernization strategy and tools, employees get a secure experience on every mobile device, tablet, or laptop they're using, all while eliminating major management headaches for IT.

WINDOWS 365: HYBRID WINDOWS FOR A HYBRID WORLD

Windows 365 cloud PC offers a new solution for today's hybrid workplace. Help your employees access the content and apps they need, wherever they are.

Consistent experience and settings across devices

Scalable storage based on your needs
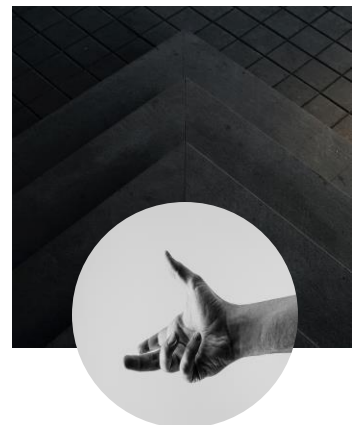

Integrated security and identity management

Enable a connected, secure workplace
