

Azure Modernization Factory

Accelerate digital transformation, boost agility and evolve your business in the cloud with the Cognizant Microsoft Business Group's Azure Modernization Factory. Providing a structured methodology and proven toolset to assess, migrate or modernize, and manage your infrastructure, applications and data with Azure.

Business Focused Outcomes

- Rationalized application portfolio
- Reduce Total Cost of Ownership
- Ensure your infrastructure, applications and data platforms are "Future Ready"
- DevOps friendly, cloud native platforms designed to scale and supported accelerated developer velocity

IP Enabled Factory Approach

- Structured, iterative and effective methodology and approach
- Powered by the 10vū™ transformation platform and Drivetrain™ orchestration engine
- Cloud Adoption Framework aligned
- Delivered by a team of Microsoft Azure experts committed to your success

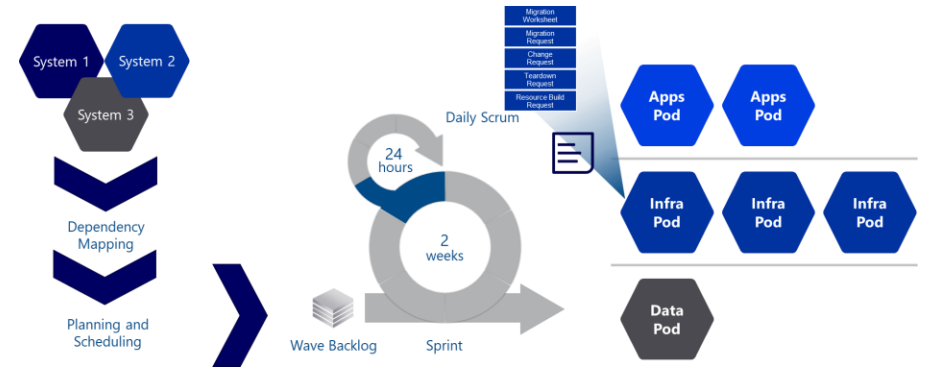

The excellent analytics and visualization processes helped us understand what needs to be done, and to feel confident that it can be done.

Cognizant MBG's Client (as 10th Magnitude at the time)

MIGRATE, MODERNIZE, AND FUTURE READY YOUR BUSINESS OPERATIONS

Phase 1 – Assessment

Agree organizational objectives and scope. Data collection powered by Movere and 10vū™ to analyse your existing infrastructure assets, workloads and applications. Assess and prioritise candidates for migration or modernization.

Phase 2 – Migration and/or Modernization

Migrate or modernize workloads to utilize Azure platform native architectures, improving platform functionality, resiliency and scale.

Phase 3 – Transition to Operations

Transformed workloads are optimized for management, whether that's performed by your team or Cognizant MBG's managed cloud experts.
