Cognizant AI-Powered Virtual Clinician

Leverage Generative AI and Azure services to bring a cutting-edge, user-friendly, and highly accurate diagnostic solution to your patients

Cognizant's AI-Powered Virtual Clinician mimics an in-person doctor visit by listening to patients' symptoms and asking clarifying questions, leveraging peer-reviewed medical data for accurate diagnoses enhancing patient outcomes and streamlining processes for healthcare providers.

Quickly address non-emergency patient issues reducing patient wait times and clinician workload

- Accurate Diagnoses: The solution leverages state-of-the-art AI technology to provide diagnoses with unparalleled accuracy, ensuring high-quality patient care

- Efficient Triage: Capable of listening to patients describe their symptoms and asking clarifying questions, similar to a human doctor, to triage symptoms effectively

- Peer-Reviewed Data: Utilizes knowledge from extensive peer-reviewed medical literature as the basis for its diagnoses, ensuring evidence-based medical decisions

- Speed and Security: Provides efficient, accurate, and cost-effective first-line medical care in a secure and scalable cloud environment

- Reduced Workload: Streamlines the diagnostic process, reducing the workload on medical staff and allowing for more efficient allocation of resources

- Award-Winning Solution: Recognized as the 2024 Solution Provider of the Year by AIconics, highlighting its innovative approach and effectiveness
