

# Microsoft Fabric 6 Week Proof of Concept

As a member of Microsoft's Fabric Partner Program, Cognizant is deeply connected with the Fabric Engineering team. Cognizant's unique IP and tools like the 'Cognizant Data and Intelligence Toolkit' and 'X to Power BI' can significantly accelerate assessments and large-scale data migrations to Fabric.

Navigate the complexity of migrating pre-existing solutions to Fabric or creating a Proof of Concept to realize an analytics platform that makes data more accessible to business users.

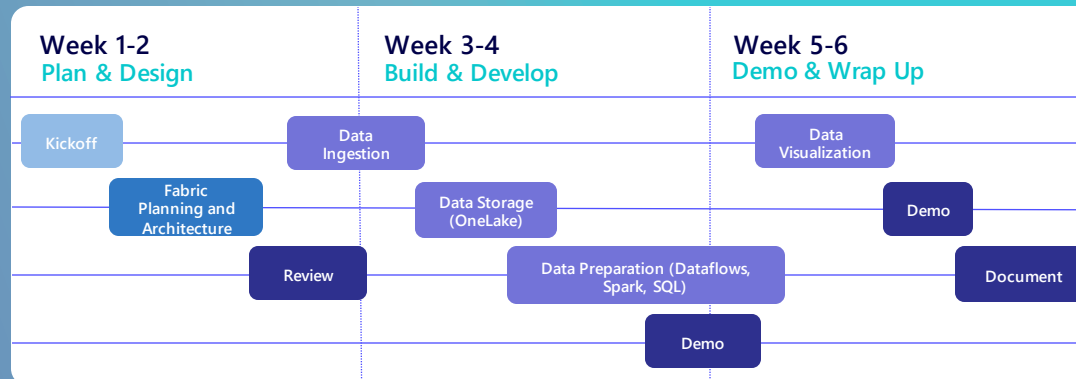

Work with Cognizant to move data into Fabric through the architectural tiers that include ingestion, storage (OneLake), preparation, modeling, and presentation.

Test drive **Microsoft Fabric** with Cognizant's deep technical knowledge from world class Microsoft consultants and unique IP & Accelerators.

Migrate existing Power BI reports to Fabric to test features and performance

Get the most from Microsoft Fabric leveraging OneLake with Delta tables, Dataflows V2, notebooks and PowerBI

# Microsoft Fabric 6 Week Proof of Concept

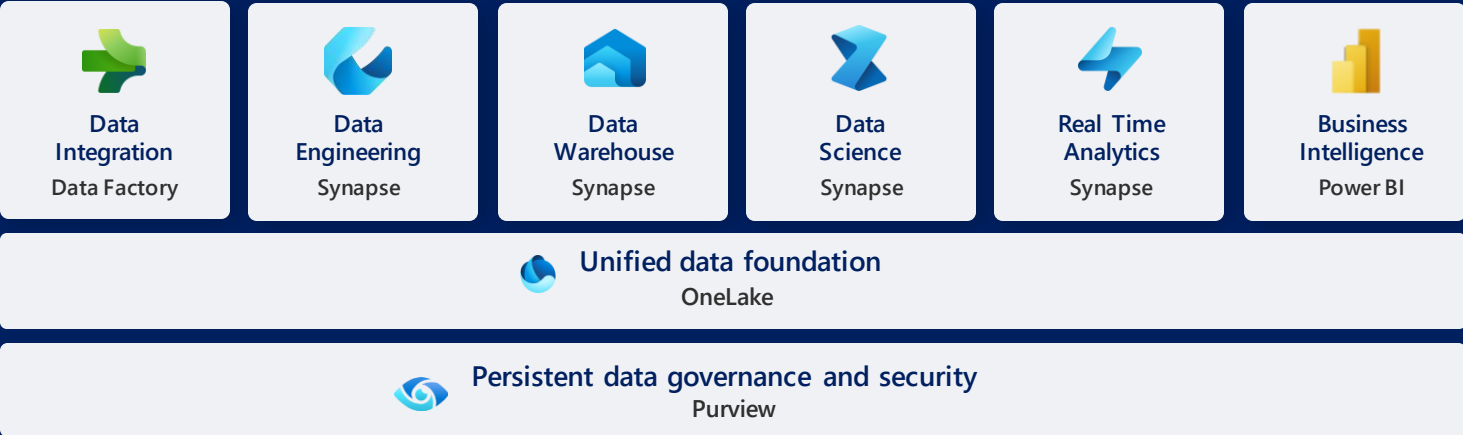

Learn about migrating a pre-existing solution to Fabric or start fresh with a new Proof of Concept.

Accelerate your data potential with Microsoft Fabric

From data integration and engineering to business intelligence and real time analytics, Microsoft Fabric enables data professionals to host all their analytics workloads in a SaaS-based, lake-first solution - eliminating organizational siloes.

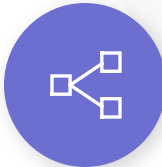

Lake-centric and open | Role-specific tools | Empower every Microsoft 365 user | Persistent governance and security

Unify your hybrid and multi-cloud enterprise data estate for analytics

Build fit-for-purpose analytics models

Responsibly democratize analytics with data governance

Scale transformative analytics applications
