Cognizant SpendWise Toolkit

SpendWise Toolkit is a cost advisory and optimization tool. It provides the usage billing data of resources, which then helps in taking informed decisions leading to resource optimization and further leading to significant cost savings.

Its versatility allows it to be applied in a variety of scenarios. Furthermore, it offers data visualizations, which enhance the understanding and management of resources using the granular reporting capabilities in a PowerBI dashboard within a single-pane-of-glass.

SpendWise Toolkit is a pre-solutioned and extensible tool that orchestrates the collection of all cloud spending, at scale. Key benefits include:

- Drives financial accountability and transparency

- Improves allocation and budgeting

- Track, monitor and forecast cloud spend

- Informed Business Decisions

- Gain Financial and operational Control

- Implement Company-Wide Best Practices
