Reduce climate impact using Windows 365 for your consultants

Say goodbye to onboarding consultants with a physical computer that they don't need. With Windows 365, powered by Microsoft, all updates and maintenance are handled same way your physical computers are , so your consultants can focus on delivering value instead of upgrading and patching outdated hardware. Work without worrying about the upkeep of your system. Plus, you don't need to worry about the physical space.

- Opportunity analysis – Technical and license requirements.
- Inventory – On/offboarding process, Hardware, Software and security stance.
- Deployment of Windows 365, Technical setup in tenant and Azure subscription, Deploying apps.
- 2 days workshop to Setup POC

Reducing climate impact is done with by using a climate neutral datacenter

Our delivery will make it possible to evaluate the possibilities of Windows 365
