

Pre-study Teams Frontline workers:

Get a complete playbook to digitize and create new ways of working for your most important functions.

Digitize and create new ways of working with Microsoft Teams as a hub for your employees, who have contact with your customers, or those who produce all products. The implementation needs a clear connection to your organization's vision, goals and the needs of the employees. Together with you, we produce a clear picture of what is possible and how this can be implemented and become a success.

- Aggregated vision
- Opportunity analysis
- Technical blueprint and design
- New digital working methods
- Clear action plan
- Commitment and implementation plan
- Basis for decision containing time plan, time estimate and cost.
- Proof of concept of the new working methods and tools that you can scale into production.

Get a vision with the introduction of Microsoft 365 linked to opportunity analysis.

We have a proven method, a toolbox with proven tools as well as certified change specialists and technical specialists.

With Microsoft 365, productivity and efficiency increase, as both modern technology and changes in working methods are introduced.
