Azure

KEY FEATURES

Tenant Capacity Metrics and Optimization
Analyze and optimize tenant capacity for efficient resource use and improved performance

Workspace Security and Component Analysis
Gain insights into workspace security and components to ensure compliance and safeguard sensitive data.

Semantic Model Refreshes and Data Source Management
Monitor and manage semantic model refreshes and data sources to maintain data accuracy and reliability.

Power BI Report Usage Analysis
Understand report usage patterns to drive better decision-making and enhance report relevance and efficiency.

Customizable Interaction Analysis
Tailor the solution to analyze specific interactions within your Fabric tenant, providing a flexible governance framework.

Custom Security and Governance Policies
Develop and implement custom security policies to proactively notify administrators of violations, ensuring continuous compliance and protection.

Why Choose Our Solution?

Our Microsoft Fabric and Power BI Tenant Governance Solution is designed for flexibility and customization, adapting to your specific governance needs. By offering deep insights into tenant capacity, security, and usage metrics, our solution empowers you to optimize your environment by ensuring efficient use of resources and improving overall performance. It enhances security by protecting sensitive data with detailed security insights and proactive policy management and it helps drive better business outcomes by utilizing actionable insights to make informed decisions and enhance report relevance.
