

Microsoft Sentinel Migration and Modernization

Migrate from legacy SIEM to Microsoft Sentinel; a cloud native SIEM + SOAR

Our approach helps clients to simplify and streamline the implementation of Microsoft Sentinel and realize the value of Microsoft 365 more quickly.

Assess your current environment & requirements

Design the implementation around desired state

Implement Microsoft Sentinel in the environment

Improve and enhance the configuration over time

In the current digital landscape, there is an urgent need for organizations to bring together data, analytics, and workflows to unify and accelerate threat detection and response across the enterprise.

Microsoft Sentinel is a cloud-native SIEM (Security Information and Event Management) solution that offers intelligent security analytics and threat detection across an organization's digital estate.

Microsoft Sentinel Migration & Modernization

empowers organizations to implement Microsoft Sentinel effectively, regardless of their existing SIEM. Our tailored approach addresses your specific needs, gradually integrating advanced features and automation for a seamless transition, better security, and successful outcomes.

Implementing and integrating Sentinel with Microsoft 365 will not only extend the value of Microsoft 365, but it will also provide measurable security posture gain and accelerated response times.

Choose Collective Insights for your Microsoft Sentinel implementation. Our expertise ensures that your organization will have a seamless integration, optimizing security, productivity, and collaboration for your organization's success.

Why Collective Insights?

Our clients' needs come first. We make sure you succeed by using our proven methodologies that drive successful organization change, which lead to faster adoption and usage. We don't just create strategies — we work together to ensure the long-term success of your business.
