

Microsoft Entra ID Assessment

Strengthening Identity and Access Management (IAM)

Assessment Benefits

Enhanced identity security posture

Improved compliance with regulatory standards

Streamlined access governance

Readiness for Zero Trust and Entra ID Governance

Actionable insights to reduce risk and improve operational efficiency

Is your organization's identity infrastructure truly secure, or are unseen vulnerabilities putting your data at risk?

A **Microsoft Entra ID Assessment** is a strategic evaluation of an organization's identity and access management (IAM) infrastructure. It aims to uncover security vulnerabilities, access control gaps, and governance improvement opportunities within Microsoft Entra ID.

Schedule a **Microsoft Entra ID Assessment** to learn how we can help assess your organization and enhance identity security, ensure compliance, and prepare for advanced capabilities like Entra ID Governance and Zero Trust implementation.

Our team can assist with creating a customized strategic plan for your organization, drawing on insights from Microsoft and industry experts. You will receive a report providing a prioritized roadmap for remediation, helping your organization address critical IAM gaps efficiently.

The assessment typically includes a comprehensive review of:

- Configuration settings and role assignments
- External user access and Conditional Access policies
- Sign-in and audit logs
- Privileged account usage and authentication methods (e.g., MFA)
- Identity lifecycle processes
- Directory synchronization with on-premises systems

To initiate the assessment, organizations will follow these steps

Step 1

Define a targeted scope

Step 2

Use tools like Microsoft Secure Score, Entra ID Workbooks, and sign-in logs to analyze

Step 3

Review external user access, stale or inactive accounts, directory sync configurations

Step 4

Engage stakeholders from security, IT, and compliance to validate findings and prioritize remediation
