BECOME AGILE NOW

BOOST PERFORMANCE AT THE CORE OF YOUR STORE

Today's retail landscape requires agility and insight, allowing you to quickly respond in an ongoing business. To continuously bring the best value at the core of the store, your employees require real-time data and should be in full control of stock operations.

Colleqtive Apps for Retail empowers your employees by bringing all information together. Even in hybrid application landscapes, all relevant information will be available to your front-end workers. They will see the right information and will be able to respond quickly to any changes and are able to control all store operations processes, with a simple touch.

With all processes seamlessly coming together, accurate store stock levels are guaranteed, in real-time. Allowing you to respond to any changing need in your omnichannel retail landscape.

"With the right tools,
your employees can work smarter"

WORK SMARTER, WORK FASTER

FRONT-LINE WORKERS MAKE THE DIFFERENCE
EMPOWER YOUR EMPLOYEES

Your employees are the most customer facing part of your company. But for many years, they have not had the right tools or the right information to do their jobs accurately. And with omnichannel retail and fulfillment processes being added to the workload, their work is getting more extensive and more complex by the day.
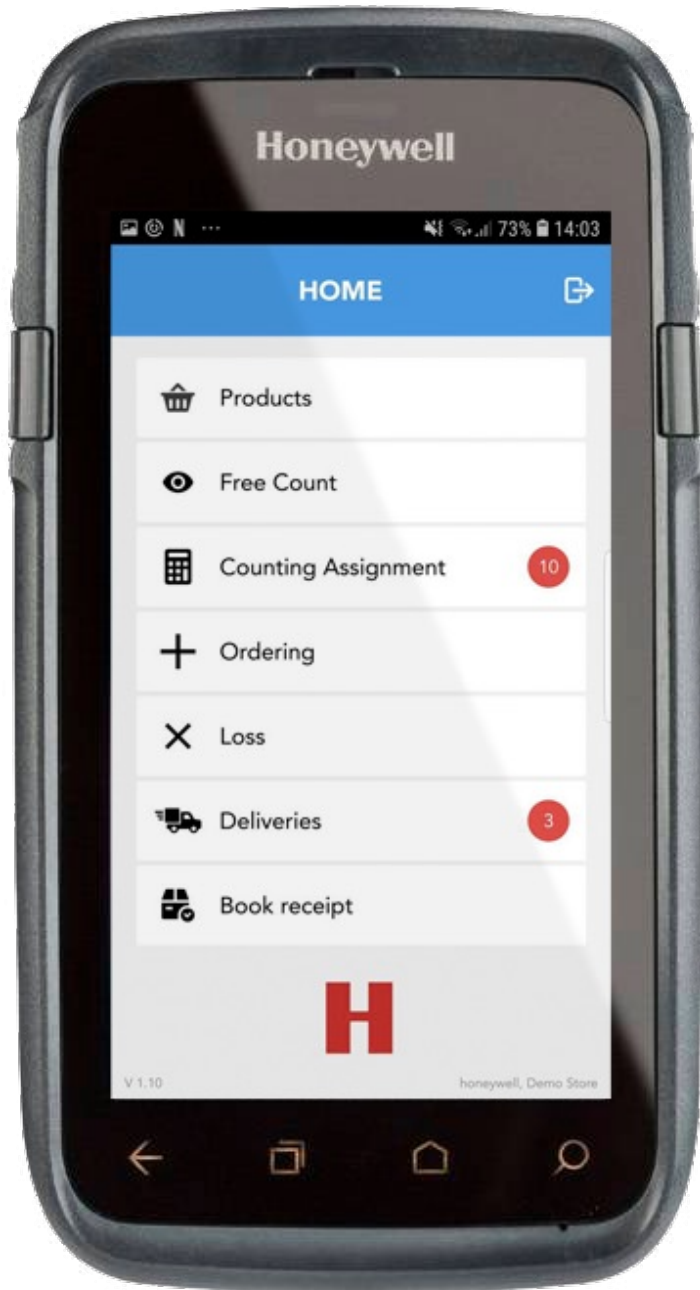

Your front-line workers require access to real-time information on store operations processes, and should be able to do any task with just a few clicks. Working together, being informed about priority tasks and exceptions, they can run the store more efficiently and in a smarter way.

Collective Apps for Retail have been designed around your store employees. Every business process has been broken down to the core, building a smart user experience for every role. Employees will be able to work intuitively and will see all relevant information and actions, at the right time.

Real-time information from multiple, hybrid, back office solutions, are merged into a fluent interface, allowing your front-line workers to work faster, by working smarter.

KEY BENEFITS

- Easy to use, no intensive training required
- All information at your fingertips
- Every process can be done in just a few clicks
- Time will be saved
- Apps are already embedded in our lives
- Connected workforce from day one

PEOPLE

"Accurate and real-time store stock is the key to victory for omnichannel retail"
