

# Cloud SBC - Direct Routing as a Service

Colt Intelligent Communications

## What Makes us Different?

- **Fully Cloud-based** No need for physical hardware and no associated maintenance costs
- **Pan-European services** In 13 different countries
- **One stop shop** - Centralise your multi-country voice solution with one provider
- **Future-proof solution** - Enable the digital transformation of your organisation into the Cloud
- **Fast installation** - Get your Cloud SBC set up quickly with no on-site visit needed
- **Solution simplicity** - Have your virtual hardware, connection and voice tariffs all in one package
- **As a Service model** - With a subscription price model, you only pay for what you use

Colt's Cloud SBC removes the need to have devices on premise to provide DirectRouting, enabling a Cloud turnkey solution in a fully cloud environment, which is available from anywhere with fully compliant and regulated voice services for your Teams application.

## Why a Cloud SBC?

The Cloud SBC allows you to leverage the benefits that Microsoft Teams can offer your organisation, all through a 100% cloud solution, proposing a simple pay per user per month model with all the necessary components to activate DirectRouting.

## Simplify adding voice to your Teams solution

Remove the need of having a physical SBC in order to set up DirectRouting and add voice on Teams. This is provided through a simplified subscription model where you pay monthly for the users you have, based on your voice consumption and usage of Direct Routing

## Take advantage of the Cloud

Gain the advantages of the Cloud:

- Bundled solution covering the voice traffic, connectivity and cloud device in a price per user per month.
- Get an as a Service solution so you have the flexibility to grow your service as needed
- Fully managed and supported Cloud infrastructure in Azure giving you the needed reliability
- Since the Cloud SBC is in Azure, it allows a close to real-time communication with Teams

## A full communication solution in the Cloud

With Colt you get the hardware, connection and tariff all through us to create a fully Cloud communication solution

### Cloud SBC

Provides the Cloud infrastructure needed to transcode the Office365 traffic

### Cloud SIP Trunk

Allowing the connection between the cloud SBC and Colt PSTN infrastructure

### Tariff

Choose from a set of predefined tariff bundles or tailor your own specific tariff.
