

Build Apps In a Day Offer

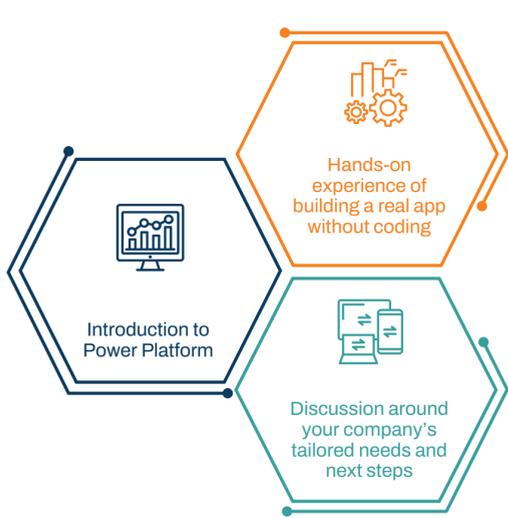

Turn bright ideas into brilliant apps

What is “Build Apps In a Day” Offer?

Columbus “Build Apps In a Day” Offer is a one-day workshop that will enable your team to create custom business applications fast and without writing code.

Our experts will lead you through the entire process, answer your questions and demonstrate Power Platform capabilities based on the real-case business scenario.

The workshop contains 3 core elements:

Delivery model
Globally, virtually or onsite

Timeframe
1 day

Participants
Business users, developers, IT

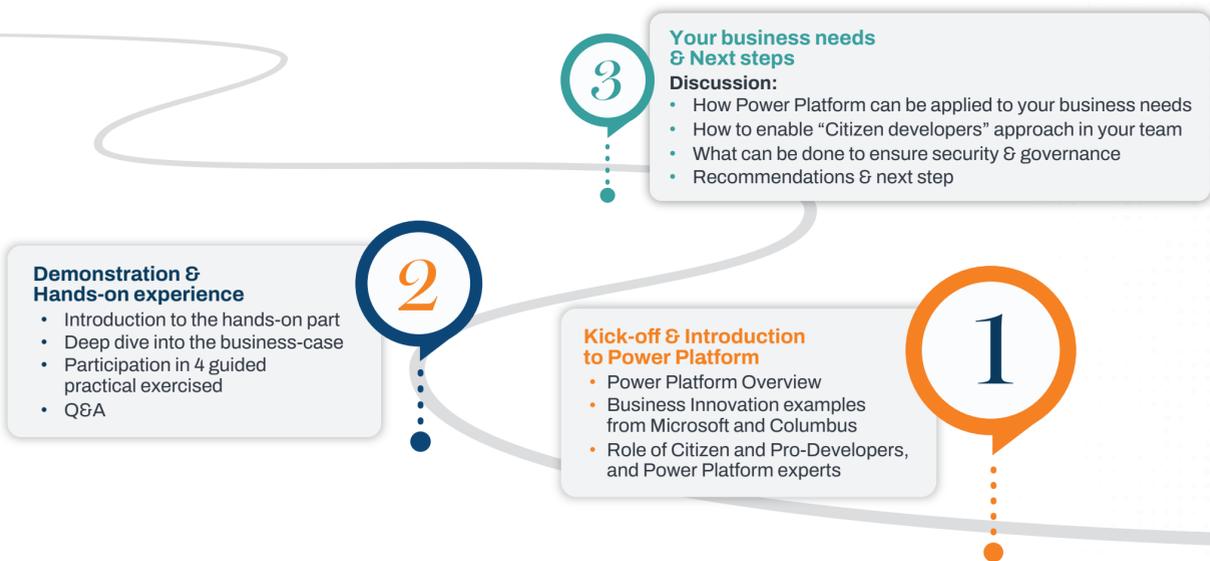

Price
Free for you, we are covering all the expenses

Prerequisites
Bring your PC, the rest we will provide

You don't have to have IT knowledge to be a part of the Workshop. On the contrary, as a business user (citizen developer) you will realize how easily you or your team can build apps tailored to your business needs to drive productivity and automation in your team.

Workshop in details

Business scenario for the hands on experience

- Imagine an organization where every three years employees go through a hardware refresh cycle
- We will streamline the device order, procurement and approval process and view aggregate reports
- The employee-facing device ordering app needs to run in a web browser and on mobile devices

What you get as the result

- Learn everything** you wanted to know about Power Platform and its capabilities
- Create custom business application** without writing code
- Learn how to **build sophisticated business processes** and complex data relationships within your applications
- Learn how to **connect your app to a variety of data** sources to bring it to life
- Learn how to **share your apps inside your organization** securely
- Get guidance** from our best experts while practicing
- Learn **potential business use-cases** and required skillset
- Get **clarity** if Power Platform can fulfill your business needs
- Discuss next steps** and build action plan

“Building the two current apps was really simple. PowerApps is a modular and user-friendly environment where you don't need to write a single line of code. That makes it easy to build a new function that pushes tools and knowledge all the way to the frontline, much to the delight of colleagues across the company.”
