

A background photograph of four women in a modern office setting. One woman stands in the center, holding a tablet and looking at it. Two women are seated at a table in the foreground, looking towards the standing woman. A fourth woman is partially visible on the far left. The office has large windows, indoor plants, and a corkboard in the background.

Power Platform – gain the opportunity and manage the risks.

Develop a strategy for the digitalization of business processes with M365. Find the right tools, skills for the user and maker and guide them to a power full approach to business digitalization.

CHALLENGES

Power Platform is a set of tools for digitalization of business processes. It empowers the users to become makers of the process and create apps to do their work more efficient. But apps, tools and processes must be maintained, managed and security and governance need to be considered.

IDEAL SOLUTION

- Strategy for Business process digitalization is defined
- Governance and Security is established
- Users and roles are specified and a road to empowerment of the workforce is defined
- A template to identify use cases and process to realize them is defined.

DESIRED OUTCOMES

- Understanding of the Power Platform, potential and risks
- Identify use cases and learn how to identify them and find quick wins in digitalization
- Finding roles in the organization
- Plan a sustainable and secure implementation of the Power Platform

Communardo Software GmbH

Power Platform Strategy

The Power Platform Strategy Workshop enables the organization to empower the Power Platform and the digitalization of business processes.

Learn about the opportunities

What can the Power Platform provide for the organization. What can be done and how can the digitalization of business can be boosted. What are the stakeholder, the skills and the prerequisites. Different Tools and the licensing.

Identify the wins of digitalization
