

Contract Management with Microsoft 365

Our solution at a glance

Contract Management with Microsoft 365

We offer a contract management solution based on Microsoft 365. Our solution provides a digital repository for all types of contracts. It features drag-and-drop functionality, direct integration with Microsoft Office, and metadata structuring as its foundation. The extensive and configurable full-text search makes it easy to find the necessary information. Additionally, automatic notifications, collaborative document editing, and approval and monitoring workflows are available.

Features

- Contract and metadata templates
- Workflows (approval, review/resubmission)
- Notification functions
- Sensitivity labels
- Optional AI functions from SharePoint Syntex
- Role and permission concept
- Integration with Digital Signature providers (DocuSign and AdobeSign)
