

Microsoft 365 Copilot Empowerment Assessment

Service Description

COMPUGEN
Dream. Design. Deliver.

Human-Centered Meets Technology-Enabled Take the Next Step in Your Adoption Journey

Artificial intelligence (AI) is rapidly changing the way we work. Many organizations are finding ways to embrace AI-powered innovation and are thriving. Others struggle to find the right path forward. That's why Compugen is delivering a multi-step Microsoft 365 Copilot Adoption Journey. This assessment builds on the work done in step one: the Microsoft 365 Copilot Envisioning Workshop. Armed with the results of the workshop, we will conduct a detailed assessment of your readiness to implement Microsoft 365 Copilot within your organization.

This assessment ensures your technical environment, your team, and your business processes are ready for Microsoft 365 Copilot. Better yet, that your outcomes will align with your business strategy and expected results.

What makes our Empowerment Assessment so unique?

We recognize the difference between an IT partner and a Technology Ally. You deserve an ally who works to earn your trust by listening, building, and supporting your technology journey; *and that's exactly what we are committed to doing*. By investing time and expertise with your teams at this pivotal step in your AI journey, you get a Technology Ally who is dedicated to your goals and invested in your future. You get:

- Real-life AI-powered scenarios for your organization as a result of the requirements we've uncovered in the Compugen Microsoft 365 Copilot Envisioning Workshop.
- A human-centric, pragmatic, and holistic approach to technology planning, fully integrated with technology adoption and change management at the core.
- An ability to realize new possibilities by demonstrating value early, and continually building on successes.

Assessment Benefits

- Clear understanding of steps needed to implement Microsoft 365 Copilot.
- Detailed path forward, focused on business areas where Microsoft 365 Copilot will have the greatest impact for your business.
- Curated Compugen insights to support AI adoption in your business.
- Confirmation that your initial workshop recommendations meet your current people, process, and platform requirements, getting you one step closer to adoption.

Microsoft 365 Copilot Empowerment Assessment

Service Description

COMPUGEN
Dream. Design. Deliver.

We Deliver Experience by Design

Dream

Armed with your Envisioning Workshop recommendations, we go a step further and deeper, gathering more specific information about your current platforms, tools, and infrastructure.

- M365 licensing evaluation with compliance, governance, and lifecycle management in mind.
- Data Access auditing to review your current sharing and access control policies.
- Data Security deep-dive, investigating your Data Loss Prevention policies, Classification, and current Microsoft environment.

Design

We deliver experience by design, ensuring that the power of Microsoft 365 Copilot is harnessed to enable your people to flourish.

- Engaging with IT and business stakeholders, we outline current priorities, share Microsoft 365 Copilot capabilities, and discuss security, data, and compliance findings.
- With a strategic lens, we meet with your leaders to solidify business drivers, desired outcomes, and identify any potential obstacles to adoption.

Deliver

From Workshop to Assessment, Microsoft 365 Copilot with Compugen provides:

- A detailed roadmap that sets you up for your Proof of Concept, the final stage in your curated AI Journey with Compugen.
- A prioritized set of deployment recommendations so you can experiment with Microsoft 365 Copilot.

Intelligence Enabled + Future Ready

AI is transforming businesses and accelerating innovation, and we're here to make sure you are ready. From envisioning your dreams to empowering your team and stakeholders with data they can use, you're one step closer to an actionable Proof of Concept and adopting Microsoft 365 Copilot for your business. Our assessment process is designed to unlock insights, identify opportunities, and pave the way to a curated adoption journey.

Your very own Report Card deliverable will outline both technology and people readiness including licensing, data lifecycle, security, permissions, governance, business adoption, and change management.
