

Microsoft 365 Copilot Readiness Assessment

Intentional AI Enablement with Security at the Core

Establish Control

The assessment helps organizations:

- Identify what Copilot can safely access
- Define what must be restricted or segmented
- Align access to least privilege
- Apply labels, DLP, and AI-specific controls
- Establish human-in-the-loop validation
- Monitor Copilot usage and risk signals

The goal is not to block AI, it is to use it intentionally.

For Organizations Ready To:

- Roll out Copilot without exposing sensitive data
- Prepare for regulated or compliance-heavy workloads
- Avoid shadow AI and unapproved tools
- Enable AI without slowing the business
- Give leadership confidence, not anxiety

Why Governance Matters

Copilot is powerful. Governance makes it sustainable.

The Copilot Readiness Assessment helps organizations:

- Adopt AI effectively.
- Secure it responsibly.
- Scale at the speed of AI, all without losing control.

FEATURES & BENEFITS

- Prepare your environment for Copilot adoption by identifying data exposure, access gaps, and governance risks before AI is enabled
- Apply practical guardrails for AI including data classification, access alignment, and policy controls to reduce oversharing and misuse
- Enable the business to scale with confidence by aligning security, governance, and AI readiness so Copilot drives value without slowing innovation

WHO WE ARE

CompuNet, Inc. is a leading U.S. information technology solution provider specializing in strategic consulting, architecture, solution design, and implementation services specifically tailored to solve business problems. With a best-in-class engineering team and approach, CompuNet focuses on building lasting relationships that prioritize customer satisfactions over sales through every step of the journey
