

Secure Identities and Access Engagement: Microsoft Entra Unified Access and Identity Protection

Revolutionize Your Identity and Access Management with Microsoft's Comprehensive Tools

Educate Your Team

Work sessions include in-depth training, provided by CompuNet's expert engineers. Learn about Microsoft's identity tools as you implement them in your environment.

Plan for Success

Assess your identity environment, evaluate future-proof options that meet business needs, and build a roadmap with the help of our expert engineers.

Security is Front of Mind

Throughout the workshop, CompuNet will recommend settings and features aimed at helping your organization stay secure as the IT and threat landscapes change.

FEATURES & BENEFITS

- Secure identities, manage access, and adhere to best practice - reducing the risk of unauthorized access, data breaches, and other security threats.
- Deploy several types of multi-factor authentication, including phishing-resistant passwordless options
- Improve staff productivity with single sign-on and self-service password reset

WHO WE ARE

CompuNet, Inc. is a leading U.S information technology solution provider specializing in strategic consulting, architecture, solution design, and implementation services specifically tailored to solve business problems. With a best-in-class engineering team and approach, CompuNet focuses on building lasting relationships that prioritize customer satisfactions over sales through every step of the journey
