

AI Agent Document Analyzer

Automate Document Review, Compliance Validation, and Insights with AI

[Add-on Solution in Microsoft Copilot Studio – Developed by Compusoft Advisors]

Overview :

Manual document review—whether for summarization, comparison, or compliance validation—is slow, inconsistent, and prone to human error. Organizations face challenges with diverse document formats (PDFs, Word, scanned images, emails), time-consuming manual checks, and the risk of missing compliance gaps against ISO or internal standards.

The **AI Agent Document Analyzer**, developed by Compusoft Advisors in **Microsoft Copilot Studio** and enhanced with **Azure AI services**, automates document summarization, comparison, and compliance validation—helping teams save time, improve accuracy, and ensure regulatory adherence.

Key Features :

- **Smart Summarization:** Generate concise, context-aware summaries from lengthy documents for faster decision-making.
- **Comparative Analysis:** Side-by-side comparison of documents to highlight version differences, risks, and inconsistencies.
- **Compliance Validation:** Validate documents against ISO 9001 and organizational policies, generating audit-ready reports.
- **AI-Powered Assistance:** Leverage Azure AI and GPT models for intelligent document understanding and processing.
- **Centralized Access:** Integrated within **Microsoft Teams** for seamless organization-wide access.
- **Automated Notifications:** Alerts for compliance risks, policy updates, and document deviations.
- **Report Generation:** Instantly create Word-format summaries, comparison outputs, and compliance reports.

How It Works :

1. **Upload Documents:** Employees upload PDFs, Word files, or scanned documents directly in Microsoft Teams.
2. **Summarization:** AI Builder extracts key insights and condenses them into clear, concise summaries.
3. **Comparison:** Multiple document versions are compared to track changes and highlight differences.
4. **Compliance Check:** Documents are validated against ISO standards using Azure AI and Azure SQL, producing structured compliance reports.
5. **Secure Storage & Insights:** All data is securely stored in Azure Storage, with audit-ready traceability and actionable recommendations.

Benefits :

- **Time Savings:** Automates manual document review, reducing hours of work.
- **Improved Accuracy:** AI-driven validation ensures consistency and minimizes errors.
- **Regulatory Compliance:** Keeps documents aligned with ISO and internal standards.
- **Audit Readiness:** Generates structured, traceable, audit-ready compliance reports.
- **Seamless Integration:** Centralized access within Microsoft Teams for collaboration.
- **Scalability:** Handles large volumes and diverse document formats efficiently.

Suitable Industries :

- IT & Software Services
- Manufacturing
- Banking, Financial Services & Insurance (BFSI)
- Real Estate & Construction
- Professional Services & Consulting
- Retail & E-commerce
- Infrastructure & Engineering
- Healthcare & Pharmaceuticals
- Hospitality & Tourism

Why Choose Compusoft Advisors ?

With over 25 years of expertise in **Microsoft Dynamics 365, Azure AI**, and enterprise solutions, Compusoft Advisors delivers **AI-powered, intelligent automation** tailored for organizations requiring accuracy, compliance, and efficiency in document management.
