App-In-A-Day (AIAD)

THE CHALLENGE

Low code development using Power Apps is an amazing way to build enterprise class business application to boost productivity without needing to write code. App-In-A-Day (AIAD) is a one-day hands-on workshop for business users and experienced developers to get started with Microsoft Power Apps. No previous development experience or knowledge of Power Apps is required.

In addition to explaining the architecture of Power Platform, the workshops focus on three main areas.

Set up: Power App set up including data sources and the navigation of the tools

App creation: Galleries, forms, controls, functions, and application execution

User Interface: User Interface and the customisation of Power Apps

SERVICE OFFERING

Computacenter will run an interactive learning session for up to 10 Power App beginners and interested parties to enable them to begin exploiting the capabilities of Microsoft Power Platform.

### Getting started the right way
- Introduction to the wide range of tools for building Power Apps
- Understand the architecture
- Guided learning with hands on experience

Practical steps to leverage the capability
- Sessions run by experienced Power App developers
- Tips and tricks on how best to do things
- Guidance of how to resolve potential blockers
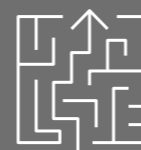

Minimal pre-requisites
- Sessions done remotely or in person
- Zero prerequisites other than browser access
- Guidance and support throughout the day

SERVICE OUTPUTS

Educate users

Show the art of the possible
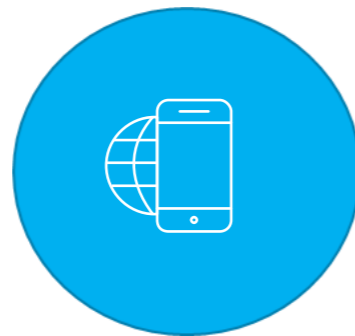

Enable Citizen Developers

OUR APPROACH

The Service will typically be delivered in a single day.

- o Prerequisites are limited to access to a laptop with a browser
- o Invites will be issued to attendees
- o Guidance and tips will be provided throughout the day
- o Real world experiences will be shared – The workshop is run by Power App Architects and Developers that spend most of their time working on customer engagements
