

# POWER PLATFORM DASHBOARD-IN-A-DAY

Presentation Deck

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD) SERVICE

These slides provide an overview of the Computacenter Dashboard-in-a-Day Service.

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## WHAT DOES IT AIM TO DO

In addition to explaining the architecture of Power BI, the workshops focus on three main areas.

**Data wrangling:** Cleaning and unifying complex data sets to optimise the use of that data

**Data modelling:** Analyzing data objects and their relationship to other objects to increase the business value of that data

**Data visualisation:** Presenting the data in ways that enable informed business decisions to be made

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## WHAT IS INCLUDED

The approach to the delivery of the Service is characterized in the following ways.

- ◆ **The fundamental process**
  - Starting with the needs of the users and working backwards
  - Improve the reliability of data by formatting in the best way from the outset
  - Create processes to optimise extraction at set intervals
- ◆ **Information to aid decisions**
  - Extracting the right information at the lowest level from multiple system
  - Track trends over time
  - Aggregate data to better manage what's important to the business
- ◆ **No more copying of Microsoft Excel charts**
  - Join data in a more reliable and scalable way
  - Drive trust in data through process
  - Single source of data to avoid discrepancies

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## TYPICAL TIMELINE

The service is typically delivered in a single day and will typically look like the following.

**10:00 – 10:45:** Welcome, Introduction and fundamentals

**10:45 – 11:45:** Data Wrangling - Transforming your data with Power Query

**11:45 – 12:00:** Break

**12:00 – 13:00:** Data Modelling – Creating readable and optimised data models

**13:30 – 14:00:** Break

**14:30 – 15:00:** Data Visualisation - Build functional reports and dashboards

**15:00 – 16:00:** Sharing and Reviewing data with Power BI

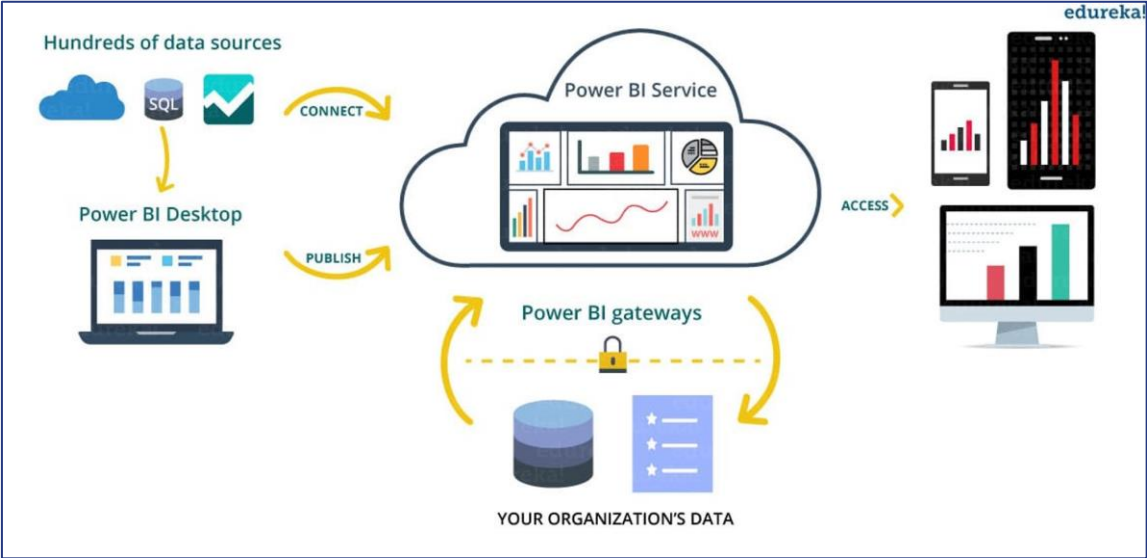

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## TYPICAL APPROACH – DATA WRANGLING

We will explore what good and bad data looks like and explore our process from moving from input data to an understandable and usable output.

Looking at the basics of Power BI and Power Query. How to transform and load our data and how to build basic visuals from it.

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## TYPICAL APPROACH – DATA MODELLING

Understanding relationships between our data and how to build a clean and well-functioning data model.

# POWER PLATFORM DASHBOARD-IN-A-DAY (AIAD)

## TYPICAL APPROACH – DATA VISUALISATION

We will look at requirements capture, how to choose the best visuals to fit your data, and share some best practices for how to create well-designed, clean and functioning reports.
