

## THE CHALLENGE

End users are not always aware of the capabilities of Microsoft Power BI and need to break out of the shackles of being limited to the use Microsoft Excel. Dashboard-In-A-Day (DIAD) is a one-day hands-on workshop for business analysts, or anyone involved with data to demonstrate the capabilities of Power BI and understand how to get started.

In addition to explaining the architecture of Power BI, the workshops focus on three main areas.

**Data wrangling:** Cleaning and unifying complex data sets to optimise the use of that data

**Data modelling:** Analyzing data objects and their relationship to other objects to increase the business value of that data

**Data visualisation:** Presenting the data in ways that enable informed business decisions to be made

## SERVICE OFFERING

Computacenter will run an interactive learning session for up to 8 Power BI beginners and interested parties to enable them to begin exploiting the capabilities of Microsoft Power BI. The session will run through the holistic approach to reporting covering: Requirements Capture, Data Quality, Data Importation, Dashboards Design, Publishing and Reporting Cycles.

### The fundamental process

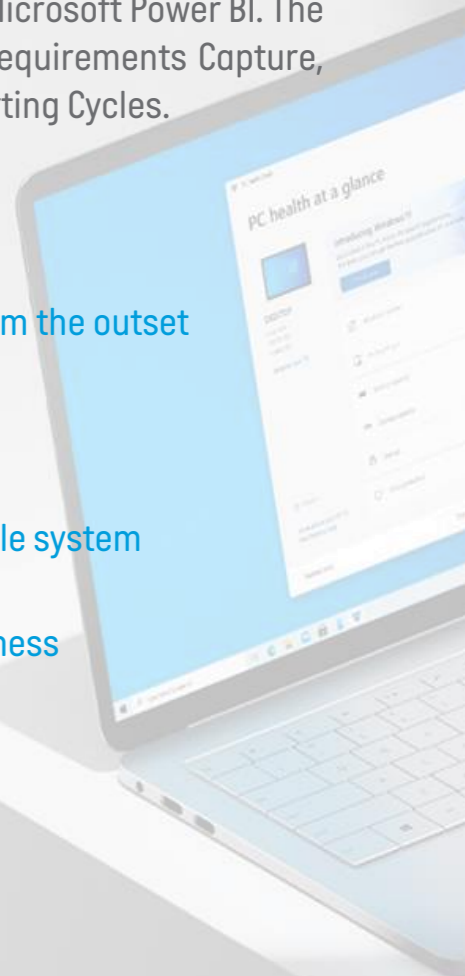

- Starting with the needs of the users and working backwards
- Improve the reliability of data by formatting in the best way from the outset
- Create processes to optimise extraction at set intervals

### Information to aid decisions

- Extracting the right information at the lowest level from multiple system
- Track trends over time
- Aggregate data to better manage what's important to the business

### No more copying of Microsoft Excel charts

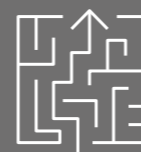

- Join data in a more reliable and scalable way
- Drive trust in data through process
- Single source of data to avoid discrepancies

## SERVICE OUTPUTS

Educate users

Show the art of the possible

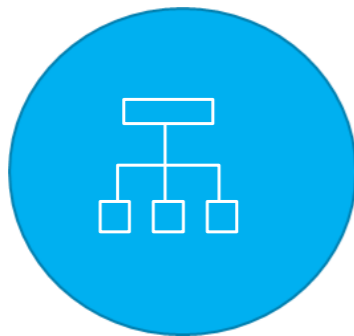

Enable business decisions to be made

## OUR APPROACH

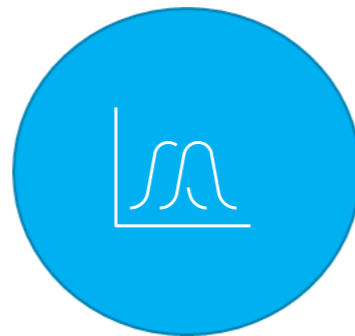

The Service will typically be delivered in a single day.

- The small number of prerequisites will be explained in advance of the engagement
- Invites will be issued to attendees
- Guidance and tips will be provided throughout the day
- Real world experiences will be shared – The workshop is run by Power BI Data Analysts that spend most of the time working on customer engagements

Find the **data** to meet your business requirement

Turn your data into **information** through Power BI

Leverage reporting cycles and guide business **decisions**
