

MICROSOFT TEAMS VOICE PILOT

REPLACE YOUR LEGACY VOICE SERVICES
WITH MICROSOFT TEAMS PHONE SYSTEM

TEAMS IS WHERE WORK HAPPENS

People love Teams, it's where work gets done. Get more value from your existing Teams investment by adding the Teams phone system to empower your users with a cloud telephony service baked directly into their favourite Office app

Colleagues

- Familiar easy to use interface
- Native integration with O365 apps
- Use from anywhere
- Use with a wide range of devices

Business

- Remove or reduce legacy infrastructure
- Reduce support costs
- Unify internal & external communications
- Supports business change (e.g. M&A)

ISDN services are ending during 2025 providing a key reason that many customers will need to replace their on-prem voice infrastructure.

Cloud voice is the right choice

PHONE SYSTEM FEATURES

Our trial offer will also allow you to evaluate the following Teams phone system features

CALL QUEUES AND AUTO ATTENDANTS

Teams call queues are holding areas for inbound calls. Call queues are used to connect callers to the appropriate agents who can assist them.

Teams Auto attendants allow you to set up menu options to route inbound calls based on caller input selections.

ATTENDANT CONSOLE

A Teams attendant console is a special client specifically tailored for use as a telephone operators console. Typically, this would be used by a receptionist or other type of employee that fields a higher volume of inbound calls

TEAMS VOICE PILOT

The pilot will be implemented over a total of 5 days and run for a maximum of 30 days. Here's the breakdown of activities by day.

REQUIREMENTS

Prerequisites and dependencies for the Team Voice Trial service

BEFORE YOU START

You must have an existing M365 Tenant and be operational with Microsoft Teams and Exchange Online

You have identified a location for any Teams Voice hardware endpoints being evaluated

You have the necessary Teams licensing (trial is OK)

TERMS

The pilot will be for 10 users, up to 3 endpoints and run for a total of 30 days. The pilot will not integrate with any existing on-prem telephony environment. Calls can still be made to PSTN numbers using minutes from the Calling Plan.

WHAT YOU NEED TO DO

You need to be able to make changes to your M365 environment required to support the pilot

You need to make any policy exceptions required to operate the POC devices in your environment for the duration of the POC

You need to ensure all pilot users have a Teams compatible device and Teams certified headset

MICROSOFT TEAMS VOICE PILOT
