

Cloud Transformation Start

Cloud Transformation Start is a consultative workshop that helps customers get started with their transformation to the Cloud. Computas will facilitate an interactive session where customers can explore Cloud functionality, scenarios, and capabilities through what-if discussions and white boarding.

With Cloud Transformation Start, customers will gain a better understanding of what a Cloud solution will involve, and have the confidence to decide on moving forward with a formal Cloud assessment, typically a Cloud Transformation Plan.

Key Activities

Note

In order for customers to actively participate in design and white board sessions, the customer must prepare some answers to the questionnaire that has been sent before the session.

Design and Architecture White Board Session

Review and discuss relevant architectures and use cases that can comprise a solution applicable to the organization. Take into consideration common and best practices and typical pitfalls to avoid.

Explore Solution Feasibility

Leveraging demos, if time permits, run through various scenarios to visualize how relevant capabilities in Cloud platform can be used to address the customer's business and technical requirements.

Insights and Next Steps

Help the customer plan for Cloud project by summarizing key insights, dependencies, and lessons learned. Identify open questions, action items, and recommended next steps.

Deliverables

- Design and architecture white board recommendations
- Executive Cloud Start report with insights and recommended next steps

Available Product Areas

- Infrastructure

Scope and pricing

- Up to two days on-site engagement within a one week period
- Includes off-site pre- and post-engagement prep and follow-up work
- Maximum of 5 participants
- Pricing will be agreed upon by customer and Computas
