

Computer Revolution Africa Group

CRAG Cybersecurity Solution Offering

Security – The Biggest Challenge For Companies

The biggest challenges that Companies face with their security tools are: Controlling coverage gaps across security levels, getting a real-time view of corporate risks; tracking performance of security controls over time; and Collecting, normalizing, aggregating, deduplicating, and correlating disparate data.

CHALLENGES

Cybersecurity is becoming tougher every year as cybercriminals perform new attacks, exploit new vulnerabilities, and execute new attacks constantly; while regulatory institutions change and improve (read: complicate) standards.

IDEAL SOLUTION

CRAG is offering a complete assessment of policies, processes and procedures and providing security solutions that help reduce complexity, cover security gaps across all levels while providing compliance programs

DESIRED OUTCOMES

Executing a comprehensive IT Security Assessment and scoping an end to end Security Solution for all externally facing systems, external web applications, internal servers, workstations, and network devices

Computer Revolution Africa Group

CRAG Cybersecurity Solution

As a trusted Microsoft Security Partner, Computer Revolution Africa Group proactively identifies threats and behavioral anomalies, while providing tailored security solutions and compliance programs to help customers reduce risks

Development

CRAG's proven Information Security Assessment Framework is developed from our client experiences and our synthesis of industry-developed frameworks.

Assessment

When identifying and quantifying vulnerabilities to prioritize the resulting risk, the framework helps ensure the client will focus on mitigating the most critical items first

Leverage

Additionally, use of our framework ensures that clients will be using a repeatable process that can be leveraged over time, well beyond the initial assessment.

Computer Revolution Africa Group: CRAG Cybersecurity Solution Offering

CRAG Cybersecurity Solution provides organizations with broad protection, native integration and automated management enabling customers with consistent enforcement and visibility across their Cloud and On-premise infrastructure.

The Solution executes a comprehensive IT Security Assessment of all externally facing systems, external web applications, internal servers, workstations, and network devices using tools such as GFI, MS Security Assessment, Movere, Cloudamize, CSAT, and VDWs.

Repeatable Security Assessments

Our Solution provides an end to end security assessment which has been developed from our client experiences and our synthesis of industry-developed frameworks. The repeatable process that can be leveraged over time, well beyond the initial assessment.

Business Value Program

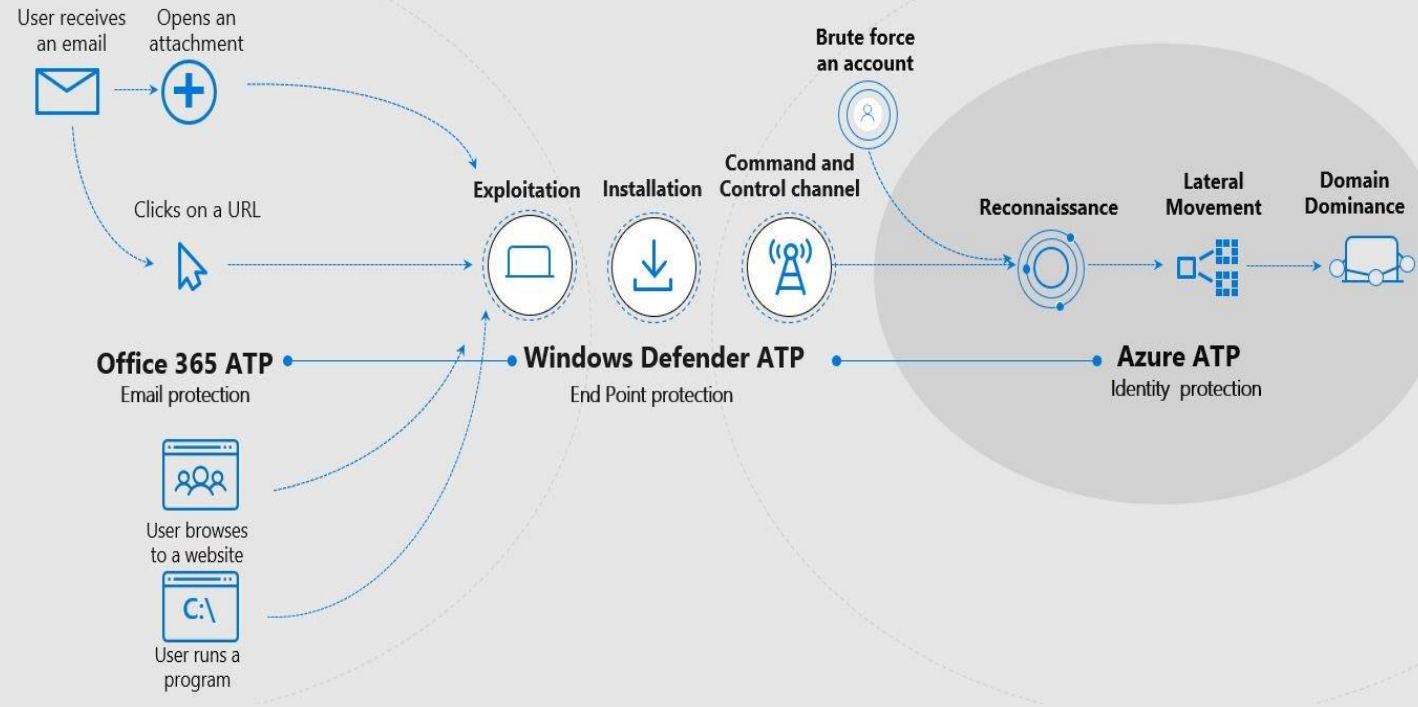

Our Value program allows us to showcase the various security scenarios through hands on activities which are customized to suite the Business Decision Maker and the IT Security persona.

Trusted Services

Through proactive SLAs we engage our customers regularly with new security technology features, regular security workshops and training of new features available on Microsoft Security

Customer success: Kenya Power and Lighting Company

Kenya Power and Lighting company in the recent times has been experiencing security threats in their environment and they did not have any visibility. CRAG came in and proposed Advanced Threat Analytics and Advanced Threat Protection, a cloud based email filtering service that guards against unknown malware and viruses by providing robust zero day Protection.

Proactive Security Stance

KPLC has since transitioned to a more proactive security plan, whereas they have always been very reactive.

Patch Management

The security Team began to act on the prioritized recommendations in the dashboard to patch vulnerable applications and enhance security configurations.

Advanced Threat Protection

KPLC considers a lot of the remediation proactive because they can receive alerts immediately and stop threats from spreading within the organization.

CRAG Cybersecurity Solution Offering

Microsoft Partner

Gold Collaboration and Content
Gold Cloud Productivity
Gold Small and Midmarket Cloud Solutions
Gold Windows and Devices
Silver Security

You do not have to wait for the breach to happen!
