-  Cloud Technical Support and Maintenance
-  Azure Site Recovery
-  Managed Cost & Security
-  Azure Cloud evaluation, implementation, and integration
-  Azure Cloud training and enablement
-  Azure Application Development Services
-  Multi-Tenant SaaS Applications on Azure
-  Managed Cloud Services for Azure Platform
-  Devops and Automation on Azure

Azure Services

Azure Consulting Services

Start turning your ideas into solutions with Cloud Services.

Azure Services

Cloud load Assessment

Performance-based : Assessments that make recommendations based on collected performance data

As-is on-premises: Assessments that don't use performance data to make recommendations

Lift and Shift (Cloud Migration)

Migrate bulk data to AWS / Azure with offline data transfer

Online delta change sync after bulk data transfer via internet.

Migrate entire instance with OS, application and data AWS / Azure

End to End Managed services for complete migration

A fast, cost-effective, minimally disruptive migration

SQL Azure Consulting

We assist organizations in Designing & Implementing a scalable & secure database on SQL Azure

We Ensure the use of best practices for using SQL Azure in ASP.NET, Silverlight, WinForms and other application Frameworks.

We help you to define and execute data migration activities from the existing system to SQL Azure. We also educate on creating the reports with SQL Azure using Reporting Services.

We do it a Better Way.

Azure Services

Cloud Technical Support and Maintenance

We work with you to put together the optimal IT strategy that includes cloud options that would benefit your company the most.

We are available 24/7 to support your needs for continuous system availability.

Our Tech support and Maintenance services are designed to protect your Cloud software environment while it is running in production.

Azure Site Recovery

EASE-OF-ACCESS

We are fast, agile, and quick restoration runs in our blood. Low downtime, guaranteed.

Our dedicated safety and compliance team ensures efficient failover management.

We free you from any need of secondary data center that keeps you cost-efficient

We offer you remote monitoring 24x7x365.

Manage Azure outages better through an automated methodical recovery system.

Leverage your VMs and Azure VMs capabilities to the fullest.

We do it a Better Way.

Azure Services

Managed Cost & Security Management

Optimise cloud costs while maximizing cloud potential

Get a full set of cloud cost management capabilities

Take advantage of the tools included in your Azure subscription to get more value out of the cloud and implement financial governance in your organisation

Azure Cloud evaluation, implementation, and integration

Move your data and infrastructure to Azure using a proven cloud migration plan. Plus, find cloud migration tools and guidance to make the most of your new environment.

Create a cloud migration plan

Choose the right mix for your applications, such as rehosting less-strategic apps with no-code changes and rearchitect others that are more business-critical.

Select the cloud migration strategy that works best for you

Azure Cloud training and enablement

Officially validate your individual Azure skills from Microsoft.

Get Trained from our Best in Class Azure Experts

We do it a Better Way.

Azure Services

Azure Application Development Services

Spend more time creating reliable and secure app experiences your users will love and less time on repetitive tasks

Create intelligent apps with an end-to-end platform to release extraordinary app experiences on the cloud and edge..

Multi-Tenant SaaS Applications on Azure

Develop, Deploy, and Manage the data tier in a wide range of cloud-based applications.

Managed Cloud Services for Azure Platform

Get security and compliance built-in

Maintain 100% uptime

Reduce your operating costs

Respond rapidly to cloud issues, 24x7

Devops and Automation on Azure

Build, test, and deploy any application to any cloud or on premises.

Learn how to combine automation techniques such as infrastructure as code with automated pipelines to provision and configure the infrastructure you need to run your applications and services.

We do it a Better Way.
