

# CW Endpoint Modernization services combines Microsoft Intune, Microsoft Defender for Endpoint , Autopilot and Configuration Manager solutions to provide modern management of endpoints with a Zero Trust strategy.

## Transformation of Users Experience

The ability of business users to connect to business data no matter where they are and from any device is a significant benefit in today’s world, but it can open up your business to security risks. Enable your employees to do their best work on any app, device, or network—while protecting company data—by modernizing the way you manage every endpoint.

With CW right endpoint modernization strategy, business users get a secure experience on every mobile device, tablet, or laptop they’re using, all while eliminating major management headaches for IT.

Computer World MEM is built from the ground up to help IT and security teams of all sizes and maturities strengthen their IT operation & security posture, find attackers, and stay ahead of emerging threats.

Our MEM service uses a combination of security expertise and manage the endpoints using bundled technologies such as Intune, sccm, Autopilot, endpoint security and App protection Policies our entire ecosystem, providing the hands-on, monitoring, proactive threat hunting effective response support, tailored security guidance, and a team of Active Response experts to stop malicious activity and help you accelerate your security maturity.

### Are you maximizing your use of Microsoft’s security capabilities? If not, we can help.

## Why CW

When it comes to Endpoint Manage and Secure, you need an experienced partner. CW offers a broad portfolio of consulting, deployment and managed security services focused on leveraging the power of Microsoft security technologies.

## CW MEM Benefits

- Unified and secure Endpoint management with a cloud enabled Transformative Platform.
- Detection coverage across the Triad to find network, user, and endpoint threats
- security operations from detection and response experts
- Bundled & controlled Endpoint mgmt. using Multiple technologies
- Windows 11 adoption and Upgrade
- Deploy the devices that are ready to go using autopilot
- Microsoft endpoint Manager with SOAR capabilities
- Transparency into Endpoint Mgmt. & operations and detailed reporting
- Microsoft Endpoint Leading security research and threat intelligence to stay ahead of attackers
- Emergency response support from CWI MEM Experts
- Consultancy Services

With Computer World's Microsoft security consulting and deployment services, you don't need to be an expert to take your endpoint security and compliance posture to the next level. Our Accelerator services are designed to get you up and running quickly and to maximize your investment in Microsoft Endpoint Manager

# End to Endpoint Management with MEM

Have peace of mind and sleep easily knowing that CW's MEM experts are available with the strategic consulting offer with skilled competent resources using the predefined solution framework for deployment.

CW Microsoft Certified team of experts will work with enterprises to implement and configure Microsoft Intune to provide for the robust management of mobile devices as well as desktop and laptop devices in a unified manner. Bring in expertise in Intune MEM, Intune MAM, Intune MDM standalone, Co-management for managing endpoints both in on-premises and cloud.

As part of this offer CW Consulting team will offer 4 weeks of implementation services to get the holistic view of the transformation on endpoint modernization using the coupled technologies such as Microsoft Intune, Microsoft SCCM, Autopilot, Windows 365 Hybrid from their existing landscape using CW implementation methodology

**Envision:** Scope of the deployment will be finalized. Initial assessment through discovery of customer IT to understand the existing Endpoint management and other relevant services.

**Build :** Design and build the data captured part of the envisioning phase

**Deploy :** Help to deploy and validate and verify the changes and impact part of this modernization to end user and fine tune as required to complete the implementation.

**Deliver :** Project deployment architecture and build guide with Low level design

## Offer Outcomes

**Better End user Experience :** Seamless experience across end-to-end device management life cycle

**Unified Design :** Centralized, simplified and complete management using single pane across various endpoint platforms.

**Ease of Onboarding** allows organizations to easily push out device policies, applications, and environments with faster and with better baselining.

**Transform remote computing** with Windows 365 and Azure Virtual Desktop.

**Secure devices** and built-in app protection.

**Cross-platform** support from Windows to iOS, and more.

**Streamline** deployments with zero-touch provisioning.

**Ensure secure, high-performance access** with Microsoft Tunnel VPN and Microsoft Defender.
