

Strategic M365 Copilot Workshop by Computer World

At **Computer World**, we don't just introduce Microsoft 365 Copilot — we **equip you to succeed with it**. Unlike generic training or overviews, our workshop is a **comprehensive, hands-on, business-aligned engagement** that ensures your organization is ready to adopt and realize the full value of Copilot — securely and strategically.

Here's what sets us apart:

Security-First Approach

We demonstrate how Copilot respects Microsoft 365's security, compliance, and permission models — giving IT and security teams confidence in enterprise-grade data protection.

Free Security & Compliance Readiness Assessment

We assess your existing Microsoft 365 security and compliance posture and give you practical, tailored recommendations to prepare for Copilot rollout.

Tailored Use Cases

We help you identify and prioritize **real business scenarios** where Copilot will deliver immediate impact — unique to your workflows and industry.

Champions Program Design

We work with you to establish a **Copilot Champions Program** — so adoption spreads faster, smarter, and with long-term value in mind.

Adoption Strategy with ROI Focus

We connect Copilot's capabilities to productivity metrics and help define a clear path to value realization across the business.

Smart AI Adoption Begins Here. Let's Build It Together.
