COMRESOURCE

ASSET RISK DASHBOARD: DETECTED DEVICES

REDUCE RISKS TO YOUR BUSINESS DISRUPTIONS

24/7 ASSET SECURITY MANAGEMENT

Do you lack real-time visibility into the security of your devices and assets?

Are you confident your devices have the proper security tools installed and are up to date?

Can your business withstand the disruption caused by a security breach...financially or to its brand?

Solution At-a-Glance

The ComResource Asset Security & Compliance Monitoring solution aggregates your data from your existing detection, inventory, and toolset data sources to provide automated real-time insights into the security health of your assets.
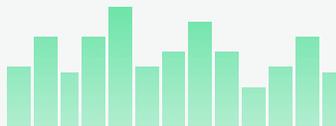

Key Performance Indicator (KPI) Highlights

- Known vs Unknown devices
- Installed vs Not-Installed security tools status
- Drilldowns by Business Units/ Regions
- Continuous quality and health check of data sources
- Data conflicts identified
- Historical trends

Solution Highlights

- Best practice implementation for security, database design, automation, and data retention
- Key data elements analysis and profiling
- Data flow business logic development and automation
- End-to-end solution testing
- Proprietary dashboards with KPI metrics and insights
